

# For a Small Town in Poland, A Tidal Wave of Freedom

# SOLIDARITY: THE IMPACT

The International Herald Tribune today begins a two-part series examining the impact of Poland's Solidarity maye ment on a single small community. Today's installment describes the rapid expansion of the movement in Pi-aseczno, a town of about 20,000 just outside Warsaw.

# By Jonathan Kandell

tional Herald Tribune PIASECZNO, Poland — A year after the Solidar-ity trade union began in this farming and industrial community about 20 kilometers south of Warsaw, what surprises its leaders and sympathizers most is the ease with which their movement took hold and expanded.

"Nobody had prepared for it, there was no clandestine organizing in the months and weeks before it started, nothing like that at all," said Anatol Luczo, 51, a patent lawyer at a local electronics factory, who asserts that his post as vice chairman of the town's Solidarity chapter is the first and only politi-cal activity of his life: "But as soon as Gdanak happened, it was as if everybody had secretly been waiting for something like that."

Piaseczno, a town of about 20,000 inhabitants, was not in a state of effervescence at the time the dissident movement of Lech Welesa and his shipyard workers surfaced in Gdansk last summer. Yet only a day after the Communist anthorities and Mr. Walesa's group signed the Gdansk agreements of Aug. 31 to open the possibility of a free trade union movement, it was as if a flash tidal wave had struck this community.

The waters tumbled out of the factories, immdat-ing almost every enterprise, every institution, every

activity of the town, reaching flood levels far above the stated aims of Solidarity's national leadership. Up in Gdansk, Mr. Walesa told his followers recently that they were standing at a crossroads: "Should we be a typical trade union which puts forward demands or should we, as Poles and as citizens, undertake the attempt to go forward in a major different direction."

But in Piaseczno that crossroads was breached months ago. The Solidarity movement here has ex-ploded far beyond the bounds of a typical trade union

While at a national level, the tug-of-war between Solidarity and the Communist Party is still being played out, in Piaseczno and probably numerous other communities the balance of power has clearly shifted into the hands of Solidarity members.

There are no party hard-liners here willing to echo their national leadership and publicly accuse the dissident movement of being infested with "anti-Socialist elements." It is difficult to find a local Communist official who will openly offer even tepid criticism of Solidarity.

### Virtual Veto for Workers

In the factories, Solidarity members exercise a virtual veto over managerial appointments and decisions, and have put into practice a rough version of the workers' management concept that Mr. Walesa is still trying to get the national leadership of the Communist Party to concede. Outside the factories. Solidarity members sit on the town council, participate in committees dealing with the food and housing crises, and distribute newsletters with a vision far different than the one put forth by the party publications and state radio and television.

"The impact of Solidarity, whether as individual members or as an organization, is felt everywhere - the whole environment here has changed," said Jerzy Lomacki, a loyal Communist, speaking from his triple vantage point of party official, town coun-

cil member, and deputy director of Piaseczno's larg-est enterprise, the Polkolor video tube factory. One of the community's five Catholic priests, a Father Krolak, suggested that the Solidarity movement had emerged as "the only organization to represent workers, farmers, ordinary people before the party and government," a role which he said the local church had tried less successfully to fill. "If Solidarity did not exist, the burden would have fall-en entirely on the church," he added. "So, yes, I support it, I meet with its people, I openly cooper-

Again and again, Solidarity members emphasize that there are no local chieftains who hold personal sway over the movement, that there are no people whose absence would cause the movement to collapse. It is perhaps revealing that the individuals who played a leading role in Solidarity's beginnings in Piaseczno, at the Polkolor video tube factory, did not go on to take charge of the movement, and today remain virtually anonymous even in their own small town.

. There is, for example, the case of Bohdan Nalep-inski, 26, a lanky blue-collar worker with a walrus monstache, who was one of the founders of Solidarity at Polkolor and yet has no ranking post in the movement now.

For five years, Mr. Nalepinski worked on the as-sembly line, and then was transferred to the section. responsible for the supply of spare parts. Although not a Communist, he was a leader of the youth group sponsored by the party. And in this capacity, he took part in an assembly of factory representa-tives — official trade unionists; managers, soction leaders and party stalwarts -- convoked by Polkolor's Communist Party first secretary last Sept. 1 to discuss the possibility of establishing a free trade union chapter at the factory in keeping with the government's historic accord with Lech Walesa the day before.

The first secretary delivered a short, hard-line

speech in which he concluded that there was no need or widespread desire for a free trade union at Polkolor. The assembly sat in silence, aware that the man was conveying a message from the party hierarchy in Warsaw that despite any agreements signed with Mr. Walesa and his Gdansk dissidents the Communist leadership was not about to open the floodgates of reform around the country.

### A Chapter Is Organized

Suddenly a young man, whom Mr. Nalepinski had always considered an ambitious, faithful Communist, sprung to his feet to challenge the first secretary and demand an open discussion. He was quickly called out of order and warned to keep qui-

"I was stunned," Mr. Nalepinski recalled. "Here was the last guy in the world I would have expected to speak out against the party. I jumped up and started protesting on his behalf. They shut me up also."

After the assembly was dissolved, Mr. Nalepinski and the young party dissident met and decided to gather a list of signatures calling for an independ-ent trade union chapter at the factory. Two days later, on Sept. 3, they took their list to the deputy director of the plant, who was a ranking party official and member of the Sejm (parliament). He de-nounced them as troublemakers and threw them out of his office.

But only a week later, following a series of small work stoppages at the factory in demand for salary increases, the deputy director called back Mr. Nalepinski and his friend. By this time, their list included more than 1,500 signatures, out of the 5,300 employees.

"He was obviously scared that something he could not understand was happening, and be apologized to us, and promised not to oppose a free trade mion," Bohdan Nalepinski said. "We really did not

Reaers MOSCOW — The Soviet Union has told its Eastern European allies that strict adherence to Kremlin-style Communism and right internal control are required to prevent troubles like those of Poland.

The message was contained in a report by the Politburo — the Soviet Communist Party's inner Cab-inet — on a round of meetings involving President Leonid 1. Brezhnev and seven foreign party leaders. The report in Soviet newspapers Sunday formally expressed approval of Mr. Brezhnev's talks and indicated that the Polish crisis had figured prominently in them.

Mr. Brezhnev met the leaders of East Germany. Hungary. Romania, Czechoslovakia, Bulgaria and Mongolia, as well as Polisb party chief Stanislaw Kania, during the past month at his boliday retreat near Yalta.

The report said Poland is con-fronted with "acute crisis phenomena" and the Polish troubles are impeding the advancement of Socialism in general. It said: "The practice of Socialist development once again convinces us how important it is for a Communist party to be strictly guided by Leninist norms of party life.

"It [the party] must show concern for the strengthening of nes with the masses and the perfecting of Socialist democracy, pursue a realistic economic policy without incurring excessive debt with the capitalist states, educate working people in the spirit of internation alism, show revolutionary vigi-lance and give a timely and reso-lute rebuff to anti-Socialist

**Polish Party Assails Solidarity Vote Plan** 

By Brian Mooney

WARSAW - The Polish Communist authorities sought on Sunday to thwart plans by the Solidarity union to hold a referendum on a call to dismiss the manager of the huge Huta Katowice steel mill.

Solidarity activists at the mill announced plans for the referendum at a rally there on Friday to protest against the manager's re-fusal to reopen the union's print-

ing press. Solidarity said 4,000 workers took part in the rally. Afterward, Solidarity said the union was drawing up ballot papers for the referendum to be beld on Monday or Tuesday.

But the Huta Katowice section of the pro-government branch un-

said the overwhelming majority of the mill's 20,000 workers con-demned behavior of Solidarity leaders. "This fact proves that the leadership of Solidarity at the plant has isolated itself from the workers," it said. forces.

A Solidarity official at Huta Katowice said about 17,500 workers there belonged to his union. Printers in the northern city of Olsztyn said Sunday that they

were continuing a five-day-old strike by refusing to publisb the local party newspaper. The two-day national printers' strike was called last week to pro-

test against what the union called an anti-Solidarity offensive in the press and to demand uncensored access to the mass media.

The Solidarity chief spokesman, ion said only that 400 people Janusz Onyszkiewicz, speaking by telephone from Olsztyn, said he **Foreign Controllers** hoped there would be an initiative to end the printers' strike there on Monday.

# Meet, Ask New Talks Polish Hijacker Charged

BERLIN (AP) - A 25-year-old Warsaw man was charged Sunday with an "attack against air transport" in connection with the hijacking of a Polish airliner to a U.S. air base in West Berlin.

Jerzy Dygas, who said he was a Solidarity messenger, was quoted by police as saying he forced the AN-24 airliner to the West on Saturday because he was dissatisfied with political and economic conditions at bome.

Mr. Dygas surrendered to U.S. military officials and freed the other 34 passengers and four crew members. Despite a request by Polish officials for his extradition. Mr. Dygas was banded over later Saturday to West German authorities for prosecution.

In Warsaw, an official of Solidarity in charge of the chapter's publications and distribution, said he had never beard of Mr. Dygas.

and France also likely to consider AMSTERDAM - The Interna-tional Federation of Air Traffic TESTTICOODS. Controllers Associations decided Sunday to seek renewed negotia-

Robert Meyer, an executive of the striking U.S. controllers, who took a train to Montreal before flying to Amsterdam, said, "I am very pleased with the outcome of the meeting." He said the federa-tion met its public responsibility by warning passengers, airlines and pilots about the danger of flying in the United States at present.

The international group accused the U.S. Federal Aviation Administratioo and the Airline Pilots Association of issuing statements on the safety of U.S. airspace that were calculated to mislead the public and said they were supported by incomplete statistics.

Mr. Mever said he presented detailed evidence of unsafe conditions in U.S. airspace during the closed federation meeting, as well as documents from the Airline Pilots Association indicating that some American pilots are con-cerned about safety standards despite assurances from their union. The documents from the pilots and a report from an independent aviation institute both indicated a higher incidence of systems errors and near collisions in U.S. airspace since the start of the strike.

The internacional air controllers' "ft would not be in the interest group criticized what it termed of a negotiated settlement to pub-lish in any way at all by written or "misleading" statements, such as that by John O'Donnell, the presioral statement or otherwise details of any contemplated or agreed acdent of the pilots' union who said last week that American air travel tion at this time," federation Presiwas as safe as, or safer than, it was dent Harri Henschler of Canada before the strike began. said. ### 'Financial Considerations'

Mr. Meyer said such statements were based on financial considera-tions. "If they don't fly, they don't get paid."

### Mr. Lewis said that any new talks would be with the controllers who have remained on the job, declaring that they were the "people that stuck with us and they're the people we're going to stick with."

Following the two-day special general assembly of the international controllers organization, a federation source said the group feared its second call for talks could be undermined by a prema-ture announcement of possible reprisals.

"It would be very wrong to assume that our silence means we were unable to reach a decision," he said.

Mr. Meyer praised the response of the delegates.

pairment in acceleration and per-

• A fleet of KC-707 tanker air-craft for refueling of the AWACS planes, the F-15s, Saudi F-5 fight-The package of military equip-ment and construction which Mr. Reagan will propose Monday, iners and, possibly, U.S. naval air-craft. The Saudis will initially buy six tankers with an option to buy two more.

> • An extensive complex of ground facilities, including stations to receive electronic and voice messages from the patrolling AWACS and ground radar sta-tions to provide an air defense screen when AWACS flights are not airborne.

The proposed deal, which Congress can veto, is expected to turn into a major challenge to Mr. Reagan from supporters of Israel. The price of the arms sale gives increased weight to an argument that in part it should be approved because it belps to "recycle petrodollars."

The issue has raised a host of questions. Adm. Stansfield Turner, former director of the CIA, has ex-pressed concern that the advanced equipment might fail into the hands of the Soviet Union if a revolution overturned the Royal Saudi government. There have also been arguments that the very magnitude of such military sales might help generate political unrest.

sion of East Jerusalem and calls Some U.S. officials said that unfor a Palestinian administrative der the plan put forward by Mr. Reagan, the United States will have no explicit or legal control over the AWACS. Nor has the Saudi government agreed to re-strictions on the planes or on high council, numbering between 11 and 15 members, that would han-There were reports that Mr. Sharon, who as defense minister is strictions on the planes or on highin charge of the occupied West Bank and Gaza, has been meeting quietly with rural, moderate Arabs performance fighters that are also being sold, the officials say.

The increase in the Saudi arms in an effort to gain support for the package is due in large part to the plan while bypassing the recalci-trant mayors of the larger municiadditional ground stations that the two governments have agreed the United States should build for Autonomy also will be discussed Saudi Arabia as part of an inteby Mr. Begin and President grated air defense package. Reagan when they meet in Wash-

At one time the sale envisioned fewer than 10 such ground stations. The total has now been more than doubled to about 20 stations, officials said. Half of them will be stations that can receive complex electronic information from the AWACS aircraft and relay it to F-15 fighter planes. Half will be more conventional ground radar stations covering the air approaches to Saudi territory.

### 'Israeli Lobby' .

The strongest opponents of the sale include members sympathetic to Israel who believe there are dangers in transferring such advanced technology to the Saudi monarchy. Israel has declared that it views the sale as a threat to its security. "We could be steamrollered." said Thomas A. Dine, the executive director of the American Israel Public Affairs Committee, the spear-head of the so-called "Israeli lob-by" in the United States, which hopes to block the sale.

Senate Republican leader Howard H. Baker Jr. of Tennessee has publicly said, "It will be a very dif-ficult fight ... I cannot now predict the outcome."

Michael Devine's children, Michael and Louise, stood with their mother, Margaret, right, at his funeral in Londonderry.

isters.

New York Times Service

JERUSALEM — The Israeli Cabinet reaffirmed Sunday its long-standing proposals for auton-omy for the Palestinian Arabs of the occupied West Bank and Gaza Strip, an issue which Prime Minister Menachem Begin will discuss with Egyptian President Anwar Sadat when they meet Tuesday and Wednesday in Alexandria.

Mr. Sadat broke off the autonomy talks a year ago in protest against Israel's formal annexation of Arab East Jerusalem - which Israel captured from Jordan in 1967 - as part of Israel's capital

Cahinet secretary Arych Naor paper said, was recommended hy Defense Minister Ariel Sharon, said Mr. Begin and his key ministers discussed the talks with Mr. Sadat within the framework of a ministerial defense committee, which is an Israeli device for not divulging the contents of the discussion.

Asked whether Israel had a new initiative to belp revive the autono-my talks. Mr. Naor said that the question had come up repeatedly and that he had a standard reply: "The Israeli government has plans,

the creation of a Palestinian state ly deferred.

**Israel Reportedly Sold F-4 Tires to Iran During U.S. Negotiations Over Hostages** 

By Bernard Gwertzman New York Times Service

WASHINGTON - Israel secretly sold Iran 250 tires for U.S.-built F-4 fighter-bombers in October during the war with Iraq, according to former officials in the Carter administration and diplomatic sources.

However, it was reported that the Israelis then delayed any fur-ther military deals with Iran under

"They asked us almost after the They said that once the United fact, when they were far down the line and were right in the middle of the thing." The former official said that Mr.

Begin was involved in some of the conversations with U.S. Ambassador Samuel W. Lewis.

The Israelis reportedly approached Washington just when the negotiations with Iran on freeing the bostages had entered a new

States made it clear that it did not want Israel to trade further with Iran, transactions were halted until after the hostages were released. **Crash** in Soviet Union

Last fall there were rumors about Israel supplying Iran with equipment. The rumors resurfaced when the Sunday Times in London said a chartered Argentine cargo

pressure from the United States. which was negotiating on the return of the hostages.

It is assumed by Reagan administration officials that the Israelis have resumed sales to Iran secretly. The Israelis, however, have told Washington that any sales to Iran do not involve U.S.-made equipment for which they would need U.S. approval, the State Department said Friday.

### Called a Conspiracy

"We have no evidence that any U.S.-origin equipment or spare parts subject to our controls has been supplied to Iran hy the government of Israel," State Depart-ment spokesman Dean Fischer said.

Iranian Foreign Minister Mir-Hossein Mousavi said on the radio in Tehran Saturday that reports of weapons purchases from Israel were part of a conspiracy against the Islamic revolution, Reuters reported from London.]

Diplomatic sources, in discussing Israel's possible motivations, said that Prime Minister Menachem Begin was willing to provide spare parts to Iran because of an overwhelming Israeli desire not to see Iraq emerge victorious in the war that began last September. The Israelis, who destroyed an Ira-qi nuclear reactor on June 7, view the Iragis as a major adversary in the Middle East.

The other reason for Mr. Begin's dealing with Iran, despite Iran's stated anti-Israeli policy, was reported to be his concern for 60,000 Jews living in Iran. When asked for an official comment, Nachman Shai, spokesman for the Israeli Emhassy, said only, "Our position is that Israel does not provide information on purchases or sale of weapons."

According to senior officials in the Carter administration who worked in the State Department and the White House, the Israeli government approached the Unit-ed States in late September and said it had been contacted by the Iranians to provide them with military equipment during the war with Iraq.

# A 'Complex Mix'

At that time the United States had put into effect an embargo on the sale of goods to Iran and had won support of its allies not to provide arms or equipment to Iran. A former State Department official said, "We felt it would not be a good idea to add the Israelis to an already complex mix and we told them to please hold off while we were going about our husiness to free the hostages. "I think they did go ahead with

at least one shipment." he said.

phase through secret American-Iranian contacts in Bonn and the publication of Ayatollah Ruhollah Khomeini's four points for their release. Those points eventually produced the agreement that led to

their freedom on Jan. 20, 1981. "We had a very simple-minded feeling that this was tough enough and delicate enough and it may all come apart, why do we have to add the Israelis to all this," he said. "It's not going to help us any. We had been fending off arms requests from a variety of questionable channels ourselves."

Diplomatic sources said the only deal concluded by Israel during the hostage crisis was sale of 250 retreaded tires for F-4 Phantom jets at a price of about \$500,000.

# **Angola Says Toll** In Air Raid Is 45 Reuters

LISBON — Angola said 45 per-sons were killed in South African air strikes in the south of the country last week and warned that an assault was imminent on the pro-

vincial capital of N'Giva. The Angolan news agency quot-ed a Defense Ministry communiquè issued Saturday in Luanda that said South African regulars, cials, it said. mercenaries and Angolan dissi-dents were massing on the Namibi-an (South-West African) border near N'Giva, capital of Cunene province. The ministry also listed military and civilian casualties at 45 dead and 36 wounded in air strikes on southern Angola since last Monday.

The communique followed Angolan reports that South African forces invaded parts of southern Angola last month. Pretoria has denied launching an invasion, but admits that its armed forces carry out frequent cross-border raids to attack the bases of guerrillas fight-ing against South Africa's adminis-

plane that crashed in the Soviet Union on July 18 was carrying 360 tons of tank spares and ammunition from Israel to Iran. Thursday night ABC television

in the United States quoted former President Abolhassan Bani-Sadr of Iran as saying in Paris that be had opposed any deals with Israel, but had been overruled hy the religious leaders. According to the report, the Israeli sale was handled through French husinessmen with the assistance of the French government. The F-4 tires were flown from Israel to France and then to

Iran on chartered planes. The former U.S. officials said that at the time of the Israeli discussion about selling the equipment, the United States shared Israel's desire not to see Iraq dominate Iran. The war has proven to be a standolf.

ABC television reported that the Iranians were able to import engines for their British Scorpion tanks through a private British firm and spare parts for M-60 American tanks through an Italian arms dealer. The equipment was delivered to Iran on a DC-8 chartered from the Luxembourg-based company Cargolux, it said. The papers were falsified with the knowledge of French offitacit

# **Obote Promises** To End Wave of Ugandan Terror

The Associated Press

KAMPALA, Uganda - President Milton Obote has pledged to root out rerrorism in Uganda and called for an end to all killings in his country.

In an address to the national committee of the ruling Uganda People's Congress Party on Thurs-day, Mr. Obote vigorously denounced what he described as "the rampant cult of killing in Uganda." It was Mr. Obote's first major

address in nearly three months. He blamed the trouble on soldiers loyal to former dictator Idi Amin, on gansters and common criminals, and on what he called "terrorists, anarchists, opportun-ists and power-bungry individuals who have nothing but contempt for the mass of people or for peace and stability."

Mr. Obote said security was improving in most of the country but was still a problem in the Buganda region around the capital and in the West Nile area in northwestern Uganda. He vowed that the gov-erament would "hunt the terrorists and bandits... in every village and

in every home." Mr. Obote was driven from office in a 1971 coup led by Marshal Amin, who ruled with a brutal hand until 1979, when he was ousted by a force of Tanzanian troops and Ugandan exiles. Mr. Obote was elected president again last

Mr. Reagan is sending written notification of the sale to Capitol Hill on Monday largely to avoid the diplomatic indelicacy of doing so on Sept. 9, when Congress returns from its recess but when Prime Minister Menachem Begin longed. of Israel will be in Washington for his first meeting with Mr. Reagan. The White House has agreed, bow-

ever, that "the clock will not start running" until Sept. 9 on the 50 days Congress has to deliberate on the matter. To block the sale, both houses of Congress must pass a resolution of

disapproval, something that has not happened since the procedure became law in 1974. Another possible reason for the

increase in the cost of the arms package, sources outside the administration said, was an unusually large order for spare parts for the AWACS, the F-15s and the associated electronic equipment to go with them. Many air forces or-der spare parts worth about 20 percent of the cost of the aircraft. The figure in the Saudi purchase, these sources said, is about 50 percent.

Although Saudi Arabia's anned forces have only 73,500 members, its 1980 military budget of \$20.7 billion was already sixth largest in the world without the present sale agreement

### **Questions on Potential**

Questions about the potential of the new aircraft to do harm to Israel will occupy much of the time of congressional hearings expected to take place in October. The United States has already contracted to sell Saudi Arabia 62 F-15 fighters, which is perhaps the finest inter-ceptor in the world. The Senate voted 54 to 44 in 1978 to permit that sale after the Carter administration gave assurances that bomh racks, range-extending fuel tanks and other equipment to "enhance" the offensive capability of the F-15s would not be sold.

The Carter administration later proposed, however, that most of the "enhancements" other than bomb racks be sold. The Reagan administration adopted this position in March, and postponed a decision on the bomb racks until late this year or early next year.

U.S. officials who advocate the sale argue that the sale does not create a serious threat to Israel. However, the administration cannot offer Israel or its supporters guarantees on this score. "We will not exercise operational control or command" over the five Saudi AWACS, a senior official said in n interview last week.

Nor, contrary to the implica-tions of some statements made by administration officials last spring, will U.S. personnel necessarily be involved in operational flights after a relatively brief training period

Instead of an explicit, guarantood U.S. veto on possible use of the Sandi aircraft against Israel, there will exist, officials contend, what might be called "control through the support function."

# **Reagan Reportedly Now Favors** Variant of MX Land Basing Plan

By Leshe HL Gelb New York Times Service

WASHINGTON - President Resear is moving toward approval of a modified and smaller version of the Carter administration's plan for land basing of the new mobile MX missiles, despite his strong past criticism of it, according to administration officials.

At the same time, the officials said, the president has decided torelegate the airborne MX plan to "option" to be considered for an deployment only after 1990.

These same officials described President Reagan as unhappy with the idea of doing anything similar to the Carter basing plan for the MX, but said he was nonetheless which the verge of accepting it as the poly idea that has been carefully thought through.

Order Given to Weinberger

In the meantime, Mr. Reagan has instructed Defense Secretary Caspar W. Weinberger to recast the original plan to shuttle 200 MX missiles among 4,000 shelters int order to overcome political op-position to deployment in Utah and Nevada and give the plan a Reagan flavor.

According to the officials, who asked not to be identified in any way. President Reagan and his key advisers who met in California for the last two weeks also reached two other decisions of equal importance:

· Contrary to earlier assertions. about spending whatever is neces-safy for defense, cost will be a cit-ical factor in decisions about strategie nuclear weapons, but not something to be talked about: openly.

"... Contrary to Reagan campaign pledges, there is nothing the United States can do in the next four years to fix what many officials and experts see as the problem of the vulnerability of station-ary land-based missiles and thus no short-term solution to what

WASHINGTON - Navy Secre-

tary John F. Lehman Jr. has said

the Soviet fleet was superior to the

U.S. Navy and was likely to ro-

"I believe today the Soviets are

better able to carry out their naval

task, which is to disrupt our vital

access to those key areas of our al-

lies, our resources and our trade,

believe the United States - which and then we die."

) (1 world, those vital areas," he said

ran K

main so for most of this decade.

President Reagan calls "the window of vulnerability" to a first. strike

Virtually all the top layer of the Reagan administration believes that Moscow is now able to launchonly a small fraction of its powerful and accurate missiles and destroy, in a first strike, almost all L000 U.S. Minuteman missiles, a strategic part of the U.S. nuclear arsenal : The officials hold this view even though they recognize that Soviet leaders would face considerable uncertainties in deciding

to launch such an attack. The lack of a short-term solution to this problem and cost consideration has led the president officials related, to look for longerterm plans. Two of the long-term solutions discussed were the antiballistic missile system to protect Minuteman from attack and the

airborne MX. Well-placed officials reaffirmed what they had related weeks ago, namely that President Reagan and Mr. Weinberger have been talking in private all along, with the defense secretary agreeing not to make any formal recommendations without Mr. Reagan's prior approval

**Reagan-Weinberger** Agreement

In other words, Reagan and Weinberger, both agreed almost two weeks ago to downplay the idea of an air-launched MX principally because of opposition from the Air Force and congressional leaders, and because of cost considerations.

The officials who agreed to dis-

cuss these matters were vague

about just how the Carter adminis-

tration plan for basing the MX

might be changed. They said sever-

al possibilities were under review. The officials said that serious

has 462 ships in its active fleet in

12 battle groups — needs a mini-mum of 22 battle groups, he said.

However, Mr. Lehman said that

MX plan.

U.S. Navy Chief Says Fleet Will Lag

1990.

Behind Russia's for Most of 1980s

consideration was not being given to the idea of putting the MX in existing Minuteman silos or building new fixed silos for MX, or digging silos deeply in the southern side of mountains to lessen the im-

pact of Soviet missiles that would have to be hurled over the North Pole. "Common Missile" Idea

The officials also said some attention was being given to the idea of a "common missile" that would consist of some combination of the future MX and the forthcoming Trident-2 missile to be fired from the Trident submarine. A main at-

traction of this alternative is that it would save money, According to the officials, many of the discussions held in California during the last two weeks have been organized to talk about the strategie choices in three time peri-

The first period runs from the present to 1986, where the princinal conclusions were that no quick fixes to Minuteman vulnerability were possible, that existing B-52 long-range, bombers should be dispersed among more bases to in-crease their survivability, that the program to place Cruise missiles on bombers should be accelerated, and that considerable funds be spent to shore up the president's command, control and communications capabilides, along with sat-

ellite systems to provide warning of missile attacks. The second phase that would run from about 1986 to the early Secretary of State Alexander M. 1990s would entail further im-Haig Jr. was also opposed to the airborne system and in favor of provement in communications and intelligence, Cruise missiles, and the advent of the Trident-2 missile some kind of land-based mobile

in about 1990. In the 1990s, the principal possibilities would be the air-launched MX, a term that stands for missile experimental, and a more capable ssile defense system.

Meanwhile, the lobbying against the air-launched MX continued last week just to make sure that the idea was dead for the time being at least: Sen. John Tower, Republican of Texas, and Rep. William L. Dickinson, Republican of Ala-bama, both leaders of key military committees, went to see President Reagan on Friday to argue against the airborne plan and the common

missile

600 ships in 15 battle groups What they and others are reportwould be enough to defeat a Soviet ed to have told the president was attempt to cut vital Western lifethat he could overcome the opposi-tion of certain congressional leadlines. # **Meese Spurns Presidential Aide's Tradition** Of a Low Profile for Life in the Spotlight

# By Lee Lescare Washington Post Service

LOS ANGELES - From deciding when President Reagan should be told about an aerial battle with Libyan planes to briefing reporters on the presi-dent's behalf, Edwin Meese 3d displayed last week the unique public role he plays, one that has won him the nickname "President Meese."

Every president since World War II has had one or two close advisers whose influence, combined in varying degrees with control of access to the Oval Office, has given them great power.

None of Mr. Meese's predecessors has been so public, however, in asserting that power. Few chose to be so often seen and photographed in the spot-light, instead seeking a lower profile and letting the president, other elected officials and Cabinet department heads play the

Mr. Meese began the week in his role as chief spokesman. briefing reporters about a Na-tional Security Council meeting. He ended it counseling Mr. Reagan not to answer reporters' questions during a brief photographic session.

### Presidential Row

In between, Mr. Meese decided not to awaken Mr. Reagan with news of the dogfight near Libya, and accompanied the president to the aircraft carrier Constellation, where he sat with the president, wearing an identi-cal windbreaker and nearly identical baseball-style cap.

Mr. Reagan's cap was labeled in gold braid "Commander in Chief." The counselor's was labeled "Ed Meese." It was the most recent of several occasions when Mr. Meese has been placed in the presidential row rather than remaining in the background, as was the pattern of earlier White House advisers.

The carrier visit occurred a day after Mr. Meese delayed for six hours telling Mr. Reagan about the dogfight, in which two U.S. Navy planes shot down two Libyan aircraft over the Gulf of Sidra off the Libyan coast.

Stora off the Libyan coast. Mr. Reagan said that Mr. Meese had done the right thing, "Yes, 4:30 in the morning Cali-fornia time is as early as I want to be awakened," the president said with Mr. Meese, standing at his side nordfing approval his side, nodding approval. Later, the president said there

was a very good defense for that decision. "If our planes were shot down, yes, they'd wake me up right away. If the other fellow's were shot down, why wake me up?" he said to laughter and applause from an audience of California Republicans.

Mr. Meese, it was explained. had not thought that Mr. Reagan should be awakened because the dogfight was long over and there was no presidential decision to be made. Like a lawyer counseling a cli-ent, Mr. Meese broke in when

reporters tried to question Mr.

Reagan about the MX missile during a photo scession Friday in the president's hotel suite.

Mr. President, you're not obliged to answer any questions," Mr. Meese said to laughter from the president and two visiting members of Congress. A minute later, another roporter asked Mr. Reagan why

the administration's decision on

**NEWS ANALYSIS** 

how to base MX missiles was shipping behind schedule. Mr. Meese interrupted to say that things are right on schedule with a decision due in three or four weeks

Mr. Meese's role was particularly visible last week in Los Ans, where he was the only senior Reagan aide in attendance throughout the week, and therefore stood out more clearly than he might have during e working week in the White House.

Whether here or in Washington, however, Mr. Meese's publie prominence fills a void created by Mr. Reagan's decision to discuss issues only rarely. Al-though the president makes frequent short speeches, a Republican fund-raising party Wednesday marked the first time he has taken quesoons from an audience

The president has held three White House news conferences, and one extended informal question-and-answer session with reporters at his ranch.

There are also the almost-daily photo sessions, lasting only a couple of minutes, during which reporters ask the president questions that Mr. Reagan aides often try to squash before the president can answer. However, the sessions are useful to the White House because they often provide the only live pictures of Mr. Reagan for that evening's television news.

Mr. Meese also is thrust into the spotlight because of the sometimes puzzling manner in which presidential decisions are timed. Decisions frequently are announced several days or weeks after the meetings at which Mr. Reagan has participated in extensive discussions on an issue. Source of Tension

The system leaves Mr. Meese, who is a Cabinet member and controls the flow of foreign and domestic policy information, in the apparent position of determining when many president decisions are to be announced.

It also creates a tension be-tween reporters and Mr. Meese. The reporters want to hear from Mr. Reagan how and why a decision was reached. Often Mr. Meese has offered an explanation and wonders why reporters are asking Mr. Reagan questions that Mr. Meese already has answered

Mr. Meese and other senior White House aides bristle at the suggestion that Mr. Reagan has delegated so much authority that he is not making all the decireleased a study on violent crime last week, White House deputy press secretary Larry Speakes was asked what Mr. Reagan thought of it. Mr. Speakes coosulted his briefing notes and re-plied that Mr. Reagan thought the report was a comprehensive job done in a remarkably short He conceded, however, that Mr. Reagan had not had time to

Anti-Communist Sentiment

While the islanders are suspicious of Communists in general, according to diplomats, they consider the Soviet Union "more expansionist and aggressive than the Chinese," an American said.

"The islanders are not reticent in making their views known," said William Bodde Jr., the U.S. ambassador to Fiji and several other South Pacific countries. He added that the new South Pacific governments had supported the U.S.-sponsored UN resolution con-

tralia and New Zealand,

the region. The islands, which show on the

With its 7-Series range BMW succeeded in introducing a new, progressive note into the highest class of motoring. Now, we have succeeded in developing that concept of excellence even further. The new BMW 5-Series complements and extends the unrivalled stature of the 7-Series and the compact, two-door top-class coupes. This new range of 4-door cars offers the highest standards of quality and workmanship, outstanding performance, exceptional comfort and spaciousness - all within the dimensions of a medium-range saloon car. In short, the BMW 5-Series brings top-class motoring several steps closer for every damanding driver.

Top class cars on a new scale: BMW 5281, 5251, 5201, 518

Our successfully achieved objective of creating cars of superlative quality in a more compact form is demonstrated most impressively by the 528 i. And the 5251, 520 i and 518 are all variations on the same technical concept to satisfy different performance and comfort requirements, but without modifying the fundamental concept in any way.

The new BMW 5-Series: never have cars of this size

- featured so much technological progress Fuel injection: standard on all models from the 520i, it ensures exceptional performance with e fuel consump-
- tion efficiency that puts many smaller cars to shame. Electronic L-Jetronic tuel injection: with energy-saving automatic fuel shut-off when decelerating at speeds

over 1200 rpm (5251, 5281).

- Double-joint, spring-strut front axle: the same patented front axle suspenaion featured on the 7-Series with uniqua anti-dive braking characteristics. 13° rear axle: with an additional trailing bar, it's a further
- development of the BMW semi-trailing arm, rear axie suspension (5281); reduces rear-end dive when accelerating.
- Speed-governed power steering: related to engine speed, it provides exceptional driver responsiveness and feel (from 5201).
- Hydraulic power-assisted brakes: with significantly increased safety reserves (5251, 5281).
- Anti-lock braking: the revolutionary safety system for unparalleled braking safety (shortly available as an option on the 5251 upwards).
- Active check-control: the new generation of BMW safety check systems, it automatically monitors all the car's vital functions (525 i, 528 l).
- SI service-interval indicator: the BMW 5-Series Is the first range of cars in the world to incorporate thie feature, which takes into account the motorist's own individual driving style and warns him of optimum service
- timina. EC energy control: another typical BMW driving aid, it tells the driver his exact fuel consumption at any given
- moment (from 525 i). Enhanced safety; a development of BMW's integrated high-security system, it offers outstanding head-on impact charactenistics plus comprehensive interior

cushloning.

- Electronically regulated heater; aveilable on all models from the 520 i.
- On-board computer: featured on the 7451, it introduced the third generation of BMW computerized dashboard controls (optional from 5251).
- 5-speed transmission: with an extra overdrive 'economy speed', it's standard on the 528 i.

Many cars set new standards in fashion. These ereate new standards in technology. The new 5-Series cars here more interior space,

more headroom and a bigger boot capacity than any of their predecessors. Yet they ere shorter and narrower than virtually every other car in the same category. And without resorting to the conventionally sloping, wind-tunnel dictated designs produced by mass-production manufacturers, the BMW 5-Series' unobtrusive design achieves new levele in serodynamics. With a cd rating of 0.38, it has one of the best drag coefficients ot any car in the same class. Combined with a unique construction, 5-Seriea aerodynemics mean less noise, better ventilation, less uplift and less crosswind sensitivity, as well as enhenced fuel economy.

From 'useful tool' to 'intelligent partner'. The BMW 5-Series introduces a comprehensive new system of driver information controle - emonost them active check-control, SI service indicator, EC energy control. Together they create a new dimension in thinking

technology': the car itself takes on greater responsibility tor its own running, allowing the driver more time to concentrate on the all-important task of driving his vehicle more safely, more economically - and with greater pleasure.

### The BMW 5-Series: as aware as the peopla who will driva them.

Drivers all over the world are constantly and consistently seeking greater perfection end better solutions to their needs: the role of the car manufacturer is to meet those requirements. With the BMW 5-Series, BMW hae eucceeded in creating a completely new set of standards in a whole category of cers. Now, with the new BMW 5-Series, the step up to motoring excellence has become decisively smaller, and the step down even areater.

BMW is aa far ahead es progress itself. So don't leg behind without good reason. Test drive the BMW 5-Series SOON.

### BMW cars.

The BMW range of fine automobiles: the ultimate in performance, comfort and safety.

INTERNATIONAL HERALD TRIBUNE, MONDAY, AUGUST 24, 1981

# **French Socialists Start Digging Into Overtones of Curiel Killing**

By Jonathan C. Randat

Washington Post Service PARIS — The Socialist govern-ment of President Francois Mitterrand has reopened an investigation into the mysterious murder of Henri Curiel, a killing entangled in speculation about Soviet intelligence penetration.

To his friends Mr. Curiel was framed. To his enemies he was a Soviet spymaster. He was assassinated in 1978 in a Left Bank apartment here. Now, with two Socialist ministers determined to clear his name, officials close to Prime Minister Pierre Maurov will seek to get to the bottom of the murder.

Almost any of 30 organizations in half as many countries could have had reasons to kill Mr. Curiel, according to those who have studied the case. Potendal killers ranged from South American dictatorships to South Africa, from Israel to the French military, which was reportedly worried by his interest in setting up so-called "soldiers' committees" or barracks unions.

A lot of people considered Mr. Curiel an enemy, a member of the prime minister's office said. "and that was worse than being a spy .... spies, after all, get exchanged." Responsibility for his slaying was claimed by an extreme rightist group, Delta, in a letter to the French press at the time of the killing. The message said Mr. Curiel. 63, was "a KGB agent and militant of the Arab cause ... Curiel. a traitor to France, which adopted him, has ended his activities." There have been persistent reports - which officials of the current administration decline to deny outright - that the outgoing administration carried off all sensitive files on Mr. Curiel.

### Born in Egypt

Born in Egypt in 1914, Mr. Curiel ran an organization in Paris that he called a charitable institution designed to help people working against undemocratic Third World governments. His accusers say it was a cover for subversion.

The Socialists, however, say they find suggestions in the files they did inherit that the Third World contacts Mr. Curiel fostered may have served Western intelligence at least as much as they aided Soviet objectives.

As a young man in Egypt. Mr. Curiel became a Communist and spent two years in King Farouk's prisons before being deported in 1951. Educated in French-run Roman Catholic schools in Cairo, he lived in France illegally until arrested in 1960 for helping Algerian nationalists. Released but still stateless, with an expulsion order hanging over his head he became what his Israeli friend Uri Avneri called "a one-man revolutionary did not participate in the vote.

# Bonn May Cut Back Role In NATO Fall Maneuvers

BONN — West German troops may have to pull out of part of NATO's autumn military exercises to save money, according to officials

The Frankfurter Allgemeine Zeitung and Frankfurter Rundschau newspapers have reported that West Germany's "Sharp Blade" exercise, part of the West German-based NATO "Autumn Forge" maneuvers, would probably have to be canceled. While a Defense Ministry statement said Sharp Blade would go ahead, a spokesman said Saturday: "It cannot be excluded that

savings will be made overall on the maneuvers." He confirmed that the ministry, which is studying ways to save about 200 million Deutsche marks (\$80.2 million) by the end of 1981 to balance the federal budget, would decide this week on thick parameters and the federal budget. which measures to take.

Defense officials said that about 40 million Deutsche marks of the shortfall had resulted from the Deutsche mark's 30 percent fall in value against the dollar during the last 12 months, raising the

cost of armed forces training programs in the United States. The Allgemeine Zeitung said the armed forces faced the choice of either scrapping Sharp Blade or withdrawing from other exercises in the Autumn Forge maneuvers. The ministry spokesman said there had been no specific instruc-

tion to save money on the war games. However, it was possible that smaller exercises within Autumn Forge might be cut, be added.

The Allgemeine Zeitung said officials were examining a proposal to save 10 million Deutsche marks on the autumn war games, which were expected to cost West Germany 47 million Deutsche marks.

Bonn has already said that next year's defense spending was to rise 4.2 percent — no increase in real terms because inflation is forecast to rise at a higher rate — and officials have said that routine air force training flights and naval sorties would have to be curtailed

# **U.S. Rebuffs Protest to Pretoria Over Squatters, Documents Show**

By Carvle Murphy

Washington Post Service JOHANNESBURG - The U.S. government, apparently reluctant to annoy South Africa before a settlement is reached on Namibian independence, reportedly refused carlier this month to join a Frenchinitiated move to have the diplomatic corps bere formally protest handling of the black squatter situ-

adon in Cape Town. Opposition by the Americans, who were later joined by the ini-tially wavering West Germans and British, deprived the move of sup-port of three influential backers and helped it kill it, according to confidential papers.

[A spokesman for the French Foreign Ministry said Sunday in Paris that his government's effort to organize the diplomatic protest had been abandoned because of the "reticence" of certain members of the diplomatic corps, The Asso-ciated Press reported. He refused

to elaborate.] Howard Walker, the U.S. charge d'affaires, said Saturday that he had no comment, "Any such conversacions, if they went on, would have been private and by in the that I am not saying they went on," he said.

More than 1,000 black squatters bia, now administered by South who have been claiming the right of live together as families in Cape are acceptable to both Preform Town were arrested last week and forcibly returned to their home-land of Transkei, where jobs are scarce. The move has angered whites as well as blacks.

The action followed a month of resistance by the squatters to government orders to leave the area. Police made more than 1,100 arrests and demolished plastic shanties, leaving families without shel-ter in the cold and rain of Cape Town's winter.

The government's handling of the squatters was defended Friday by Foreign Minister R.F. Botha, who implied a separate standard was applied to South Africa because governments around the world acted against squatters, "but when we in South Africa are faced with a similar dilemma, look what happens to us."

The reported diplomatic discussions reveal a divergence of approach to South Africa between France's Socialist government and Washington, If the cleavage grows, it may pose serious problems with-"contact group" of five Western countries trying to draw up settlement proposals on Nami-

# Shadow of 1978 Invasion in Zaire Still Hangs Heavily Over Kolwezi In addition to the Gancher, Sterling and Suffert accounts, similar

By Alan Cowell New York Times Service

KOLWEZI, Zaire — Some peo-ple did not claim their dead, and the bodies lie in paupers' graves, where crabgrass curls around stenciled name boards and numbered pegs that are their only memorial.

In the places where they died in the shuttered white-painted villas wreathed in bougainvillea on avenues plashed with jacaranda, or in the meaner streets of the poor quarter — the bullet boles have been plastered and painted over, as if to deny an unwanted mem-

Yet three years after a rebel in-vasion of Kolwezi, a small, southern town at the core of Zaire's mineral riches, the memory of the bloodshed lingers with a stubbornness that equals the traumatic violence of the incursion.

It is present in the cracked windowpanes that have not been repaired; in the bleak, overgrown cemetery on the outskirts of town where the dead of the May, 1978, invasion lie, and in the imper-manence of some styles of life.

### About 850 Were Slain

The invasion by 3,000 men of the Marxist-inspired Congo National Liberation Front, based in neighboring Angola, claimed the lives of 93 whites and some 750 blacks. The latter figure is uncertain because the casualties among

the blacks were not counted as meticulously as were those among the whites. It was one of the worst massacres in recent African histo-

ry. To the visitor, returning after an absence of three years, there are striking sights. Some whites, who run the copper mines and cobalt plants that earn much of Zaire's foreign exchange, have returned to their villas, living again behind the high steel gates that provided only a delusion of protection in 1978. The Hotel Impaia, where women reportedly were made to dance on a small stage before they were raped and shot, has been revived, 200. and there are monkeys and mon-

gooses in its little zoo. A new nightclub, L'Etoile, has been opened.

## White Community Is Diminished

These, however, seem to be trappings that recall a Potemkin age: Beyond them, residents say, there is a nervousness among the whites and among the blacks, who outnumber them 40 to 1, and there are the same complaints of grinding poverty that allowed the rebels to depict themselves as liberators of a downtrodden people. The white community is about

up with the Solidarity people in Warsaw and asked them for advice.'

### Like an Epidemic

Free trade union chapters were organized at all the enterprises in Piaseczno. A Solidarity office, with 14 representatives elected from the various factories and other employment centers, was established in a ground floor storefront at a small, gray shopping complex on the outskirts of town. The office is supposed to be a liaison between the grass roots Solidarity chapters and the town council. Through its constantly clacking telex machine, the office relays information to and from the regional Solidarity headquarters in Warsaw.

The Piaseczno office is also a meeting place for Solidarity mem-bers and sympathizers - pensioners, housewives, workers, professionals, students --- who troop in everyday to pick up Solidarity newsletters, complain about food and consumer product shortages, discuss politics, keep tabs on what is happening in local factories and municipal offices, or simply social-ize before heading home or to work.

Back at the Polkolor plant, the free trade union movement spread like an epidemic, so that today, less than a year after its introducton, 82 percent of the 5,300 employees are Solidarity members. This includes virtually all of the hlue-collar force, and numerous technicians, engineers, and middle management officials.

### **Defections From Party**

When Solidarity began to organize at the factory, the Communist Party leadership in Warsaw asked some of its local members to infiltrate the new trade union group. But after many Communists start-ed joining of their own accord, the party balked and tried to put a stop to the defections. It was too late. About half of the 600 Communist Party members at Polkolor are now Solidarity partisans as

"At this point, if the party ordered me to denounce Solidarity, I would ignore it," said a Commu-nist who joined the free trade union movement at the factory and considers himself a party reformer. A lot of other party people here feel the same way." The most common reason cited

24-8-81

by Polkolor employees — whether Communists or not — for joining Solidarity was the ineffectiveness of the trade unions officially sponsored by the party. At its base, on the plant floor,

the old union kept a semblance of democracy by electing members to its so-called factory board. But this board had no influence on the regional and central chapters of the union, whose membership was appointed by the national party and government. In most cases, the union suffocated workers' demands for higher salaries or improved joh conditions. At other times, it merely informed employees of decisions

5

petus by disastrous mismanage ment and planning at the factory. Polkolor was one of the typical. grandiose projects conceived by former Communist Party leader Edward Gierek that were supposed to create new, sophisticated indus-tries to meet consumer expecta-tions and earn foreign exchange many, are moving ahead with their own plans to produce color video abroad. equipment.

Under a technical agreement with RCA and Corning Glass in the mid-1970s, Polkolor was to reach 600,000 color video tubes in annual production by 1981 and perhaps even attain 900,000 units a year later on. Only a fraction of the output would be for domestic consumption, with the bulk to be exported to markets in Western and Eastern Europe.

But Polkolor turned ont to be a classic example of Murphy's Law: everything that could have gone wrong ended up going wrong. Be-cause of the chronic and politically bor discipline has aggravated pro-duction problems, and that even if explosive housing shortage in the the factory's financial problems were to ease up, Solidarity's mili-tancy could hobble management. country, construction equipment and personnel were diverted away from the factory. Although the plant was to have been completed by the end of 1979, it is not fin-By last December, Solidarity felt strong enough to create a so-called ished. Other factories, which were supposed to receive the video tubes and put together finished color television sets, are behind

A Crisis of Morale

The worsening trade balance and alarming foreign debt of the country have left almost no hard currency for the import of equip-ment and spare parts essential to Polkolor's operation. There are uge gaps and bottlenecks at the

factory. Technicians must con-stantly intervene in the production process, removing vidco tabes from the sputtering assembly line, adding on missing parts in artisan-like fashion, and then placing the video tubes back on the assembly

plant.

Workers Reject Appointment

changes Solidarity was proposing. He was forced to make a presenta-tion to an assembly of the employ-

ces on his plans to pull the en-

terprise out of its quagmire. Ac-

cording to a manager who attend-

ed the gathering, the employees sat silently through Mr. Bilip's hour-

long speech, and then spent almost

so we decided not to formally ac-

cept his appointment," explained Czesława Kuzniewska, a plant en-

gineer who is one of the more mili-tant Solidarity leaders at the facto-

ry. "We are keeping a dossier on

him, and we may decide sometime

plans and even his credentials.

When Jerzy Bilip was appointed

Output reached only about 30,000 units last year, and proba-bly will not exceed 50,000 tubes in

"Morale in the work force be-comes disastrous under these con-ditions," said a production manager, who estimated that the factory's meager ontput justifies no more than 1,000 employees out of a labor force five times that size. "Every day you see bundreds, maybe thousands of people just standing around with nothing to do. It is not their fault."

Solidarity spokesmen insist that the morale problem was aggravated by the incompetence of the faced by the incompetence of the fac-tory's ranking managers, whose appointments appeared to have re-sulted mainly from their personal ties to party chiefs in Warsaw rather than because of their professional or executive talents.

"If a deputy director made a mess of his job, he was just rotated to another top position either here or at another factory." said a middle-level manager, a Communist Solidarity - including a producwho agreed with Solidarity's alle-gauons. There have been manaist, an accountant and a skilled jagers here who did not have the borer, who agreed to a lengthy in-

en so far behind schedule that foreign export markets have been irretrievably lost. Western Europe is virtually saturated with color television sets. And several East European countries, including Yugoslavia, Hungary and East Ger-

# · Pretus Malaysia, in Shift From ASEAN, Calls **China a Major Threat**

By Henry Kamm

New York Times Service KUALA LUMPUR, Malaysia - The new government headed by Prime Minister Mahathir bin Mohamad is striking a vigorous new note in the foreign policy of the non-Communist nations of Southeast Asia by publicly emphasizing the theme that China remains a major threat, and urging the United States to bear this in

Worried by China's skillful ex-ploitation of Vietnam's alliance with the Soviet Union and its invasion and continuing occupation of Cambodia, the Mahathir government, which came to power last month, has moved quickly to make public the sentiments that have always been harbored here but had been sublimated while Malaysia followed the policy of the Associa**oon of Southeast Asian Nations.** 

This policy, set largely by Thai-Jand, on whose borders with Laos and Cambodia Vietnamese troops are stationed, is to depict Vietnam as the principal threat to the re-gion and to view China as a friend-The Killer ly power. China collaborates with Thailand in supporting the ano-Vietnamese Cambodian forces that operate in enclaves on the Thai-Cambodian border.

Even under the previous government of Prime Minister Datak Hussein bin Onn, who retired because of poor health, Malaysia and indonesia had regarded with skep-ticism the strongly ano-Hanoi line set by Thailand and Singapore, but had given their support because ASEAN loyalty demanded that they accept the lead of Thailand, the association's "front-line" state.

### Break With ASEAN

But earlier this month, on a visit to Indonesia, Dr. Mahathir, a phy-sician, in effect broke with this policy by stating publicly that he did not believe that Vietnam, in its present state of weakness, represented a dire menace to the rest of Southeast Asia. Since Vietnam invaded Cambodia, Thailand has consistently depicted itself as being under military threat.

In recent interviews here, twoleading policy-makers laid heavy. emphasis on the Chinese, rather than the Vietnamese, threat to Southeast Asia and urged the United States, in its present stance of goodwill toward China, not to disregard the security interests of its friends in Southeast Asia.

1 the set

in separate interviews, Deputy Prime Minister Musa Hitam and Foreign Minister Mohamad Gha-zali Shafie voiced strong displeasure with the attitude displayed by the Chinese premier, Zhao Ziyang, when he visited here earlier this month. On the issue that Kuala Lumpur considers the touchstone of its relationship with Peking, Chinese support for insurgent Communist movements in this region, Mr. Ghazali said, "We didn't get anything."

An Asian diplomat who has studied the verbatim transcript of the Mahathir-Zhao meeting, which he described as short and cool confirmed the ministers' assertion that Mr. Zhao did not respond to the standing Malaysian demand that China publicly denounce its backing for the Communist Party of Malaya, which remains in armed insurrection; and the diplomat said Mr. Zhao reiterated that the Chinese Communist Party owed "moral and political sup-port" to the Malaysian Commu-

Mr. Musa, a former university lecturer in international relations, voiced particular annoyance over recent broadcasts by a new radio station of the Malaysian Communists, after China had assured Malaysia that it would end the transmissions that for many years had been beamed here from southern China. He said that, on its last day of broadcasting, the China-based station announced that an-

other station would continue the broadcasts. A new station, believed to be a mobile unit in the jungle on either side of the Malaysian-Thai border, began broadcasting the day after the Chinese station shut down Somebody had to give funds and ideas to the new radio," said Mr.

Ghazali. The Malaysian leadership is ready to recognize a major Victnamese role in Southeast Asia, particularly in Cambodia and Laos. While Mr. Musa and Mr. Ghazali condemned the Victnamese occupation of Cambodia, they spoke sympathetically of Vietnam's struggle for national survival

Mr. Ghazali said Vietnam was entitled to play toward Laos and Cambodia a role similar to that played by Indonesia toward its said, "but not the dominant pow**INTERNATIONAL HERALD TRIBUNE, MONDAY, AUGUST 24, 1981** 

# **China Floods Laid to Denuding** Trees Were Felled Indiscriminately for 3 Decades

New York Times Service

PEKING - As waters from the second major flood in a month receded in Sichuan province last week, Chinese officials and scientists disclosed that deforestation in China's most populous province was a major cause of flood devastation there.

Tan Qilong, Sichuan's Communist Party secre-tary, said the indiscriminate cutting of trees during the past three decades had denuded most of the province's watershed areas in the upper reaches of the Yangize River. This had allowed the water from normal summer downpours to flow unchecked into tributary river systems, he said.

Mr. Tan called it a "painful lesson" but did not attribute part of the deforestation to wrong poli-cies in Peking, as have officials in other areas.

Flooding in July in the province of about 100 million people 753 person dead, about an equal number missing and 1.5 million homeless. In flooding last week, provincial disaster relief officials said 15 persons died and thousands of homes were destroyed.

The official party newspaper, People's Daily,

1979

# reported that a survey by a team of scientists of Sichuan's 193 counties showed that in only 12 councies did forested areas exceed 30 percent of the land area. In Wusheng County, which was inundated last month, cutting during the last three decades had reduced forests from 24,700 acres to 138.3 acres.

The newspaper also reported that forests in central Sichuan, where the July flooding was most severe, covered less than 3 percent of 27 counties formerly considered to be forest areas.

Partly as a result, the scientists found, hundreds of millions of tons of valuable topsoil is being swept down rivers annually, reducing the area of land able to sustain crops or even trees and grass.

Under the edicts of Mao, such as "Take grain as the key link," farmers were authorized to strip the land of trees to plant wheat and corn, and to plow up grasslands in the north that had held back the deserts. Scientists have estimated that it will take decades of planting and cultivation to restore watersheds and grasslands.

# Japan Plans Rise in Aid to South Korea, But Is Wary of Military 'Burden-Sharing'

By Henry Scott Stokes New York Times Service

TOKYO - Japan will make a moderate increase in economic aid to South Korea this year from the level last fiscal year of \$83 million, in response to a Korean request for a major expansion in Japanese aid, Japanese officials said.

Foreign Minister Lho Shin Yong of South Korea asked For-Minister Sunao Sonoda on Friday to step up "official devel-opment aid," meaning low-interest state loans, to \$6 billion in a fiveyear period starting in 1982.

'It would be extremely difficult for us to meet your request," the Japanese press quoted Mr. Sonoda as saying, Instead, Japanese officials are expected to agree to an increase in aid in this fiscal year, starting in April, but nothing like the amount envisaged by the Koreans - which would represent

a 14-fold increase. The amount of aid to be authorized for South Korea is unknown. It is likely to take some time to negotiate, Foreign Ministry spokesmen said. The Japanese and Koreans began "working-level talks" at sub-ministerial level here Saturday.

**Improving Relations** 

The talks between Mr. Sonoda and Mr. Lho, the first meeting at the Cabinet level between the two countries in three years, lasted two days. Both sides appear to be determined to improve relations

after a turbulent period in Seoul should make up for this by aid to following the assassination of Pres-ident Park Chung Hee in October, Sout

Relations between the two countries were almost at a standstill during that period. The late pre-mier, Masayoshi Ohira, did not visit Seoul, although his predeces-sor, Takeo Fukuda, had intended to. Premier Zenko Suzuki has also refrained from going to South Ko-rea, having sent Masayoshi Ito, who then was foreign minister, to

guration of President Chun Doo Hwan. The present formalities are important to the two countries. Japan s probably the most successful in-

strial nation in the world now, and South Korea, which suffered from acute economic recession last to \$21.4 billion over the next five year, needs Japanese assistance. The Japanese were courteous to

Mr. Lho. Mr. Sonoda promised to help South Korea in "nation-build- to Asia. ing," a key phrase for Mr. C. Mr. Lho, who was received by Mr. Suzuki, asked the premier to help South Korea cope with "the threat from North Korea."

But the Japanese were caudous in responding to the Korean effort to link their need for economic aid with the role the Koreans claimed that South Korea played in de-fending Japan. Mr. Sonoda said Japan would try to help South Korea, but he also said Japan could not agree to a Korean concept of

"burden-sharing" in defense. Before Mr. Lho's visit here, Ko-rean Premier Nam Duck Woo, an economist and technocrat, told Japanese reporters in Seoul that South Korea spends 6 percent of its gross national product on its military. He implied that Japan, which devotes only 0.9 percent of its economy to military spending,

U.K. Cab Driver And £240,000

The Japanese resisted that argument, which they believe the South Koreans had been encouraged by Washington to make. The United States, which has 37,500 troops in South Korea, has pressed Japan to increase military spending, espe-cially since the Soviet intervention

the Japanese state budget is deeply in deficit; he also told the Korean minister that Japan's total official aid program, excluding private loans and investments sometimes considered as aid, would amount years. Out of this, about 70 percent was to be in bilateral aid; and of that, some \$10.5 billion would go

This includes China, Southeast Asia - Japan's main recipient of aid - and India. For Japan to give the lion's share of all aid in this part of the world to South Korea alone was clearly impossible, Mr. Sonoda implied.

**Cuban Doctor Defects** 

During Stop in Lisbon

LISBON - A 31-year-old Cuban doctor has sought political asylum in the West after fleeing from an Aeroflot Moscow-to-Ha-

vana flight here. Rafael Bailly Cadiz had been on vacation in the Soviet Union, police said Saturday. More than a dozen Cubans have defected here during refueling stops.

**India and Pakistan: Logic Vies** For Amity Against Old Mistrust hood of renewed warfare. But culobscured the earlier humiliation. By Michael T. Kaufman but the fear of an aroused and miltural memory is clearly a factor. New York Times Service But at the same time, Indians scoff

NEW DELHI - A senior Indian diplomat was assailing the 'naiveté" of a foreign visitor. "You simply do not understand the Pakistanis," he said. "I tell you, when I was interviewing the officers we captured in the 1971 war, one after another said they would be back to plant the Pakistan flag on the Red Fort in Del-

And, in Islamabad, an equally senior Pakistani Foreign Ministry official observed. "I am sure that. at some level, our Indian friends are certain that, deep in our hearts, we Pakistanis are intent upon restoring the Mogul empire. He smiled and added, "And you know, until the loss of Bangladesh, some of us did dream such dreams."

Last week, in the latest instance of anxiety and mistrust, Prime Minister Indira Gandhi told the Parliament in New Delhi that the Indian government was very un-happy about the U.S. decision to sell sophisticated weapons to Paki-stan. The package includes F-16 jet fighters that Mrs. Gandhi thinks could only be used against India. Pakistan, she said, was not pre

pared to provoke or confront the Soviet Union and the weapons are far too sophisticated for use against Afghanistan. Her inference was clear to compatriots who have fought three wars with Pakistan since the two countries were cleaved from British India.

### Mrs. Gandhi's Comments

In Islamabad, Mrs. Gandhi's comments raised hackles among military leaders who contended that India is seeking veto power over the exercise of its smaller neighbor's sovereign rights. Pakis-tanis believe that India, increasingly fearful of their growing links to the Islamic world, might be tempted to thwart the anticipated arms deliveries by intensifying a war of words and nerves.

The two countries have no shortage of substantial issues for disagreement. Pakistan has long been jealous of India's nuclear capabilities. India is wary of Pakistan's reported attempts to gain atomic parity. And there is Kashmir, whose boundaries and ues are still in dispute.

But much of the mistrust and uneasiness between the neighbors rests in a kind of cultural subconsciousness that predates their independence. To many Hindus, parucularly in northern India, the image of the Pakistani is linked with conquest of the 16th century Islamic Moguls. Despite attempts at religious conversion, the majoriof the Moguls' subjects retv mained Hindus.

The memory of the more recent domination by Britain may have itant Islam is reflected in everyday at an outsider's observation that it conversation. But India, unlike Pakistan, professes itself a secular seems unlikely that a country of 80 state and Moslems, who represent million would attack a nation of nearly 700 million that has won 10 percent of the population, have their three previous wars.

# **NEWS ANALYSIS**

full rights of citizenship and occupy high positions in government.

This, however, does not diminish the nightmares of religious fratncide or the compensatory dreams of revenge. For example, some in-dians have been profoundly sbocked in the last month by a spate of conversions in which untouchables, or Harijans, the casteless people at the bottom of the Hindu hierarchy, have become Moslems in public ceremonies.

The numbers involved in these conversions have been relatively small, not more than a few thousand, but the reaction has been intense with allegations that large sums of money from the Gulf are streaming in to tempt the mainly impoverished untouchables to change their faith.

### Cultural Memory

Hindu fundamentalists have organized reconverting parties and are following in the wake of the conversions in the hope of hring-ing the Harijans back to Hindu-

ism. At the Foreign Ministries of both India and Pakistan, men shaped hy modern customs readily concede that there is little likeli-

# China to Keep a No-Rank Military Despite Its Own Reports to Contrary

The Associated Press PEKING - The Chinese government, in an unexplained reversal, has denied its own news report that the country will restore a system of military ranks. Ranks were abolished at the

start of the Cultural Revolution in 1966 in a move to end distinctions between officers and enlisted men. The only clues to a military man's position now are his age and the greater number of pockets on officers' uniforms.

"In order to strengthen the modernization program in the army, we are planning to reinstate a system of military ranks," Yang De-zhi. China's chief of general staff, was quoted as saying Friday night by the Chinese news agency.

Later that night, the news agency ran the same story hut deleted reference to military rank. The story had also been reported on radio Fnday but was dropped from later reports. China's Communist Party newspaper did not menuon a new system of ranks. The news agency subsequently

# Vanish Together

The Associated Press LONDON - A taxi driver who has disappeared with about £240,000 that had been left in his cab is being sought throughout Britain, authorides

said. Detective Chief Inspector Peter Jay, who is leading the search for Scotland Yard, identified the driver as Christopher K. Butler, 33. He said that Mr. Butler drove Kizito Idehen, 22, a Nigerian businessman who was a regular client, from Mr. Idehen's home in North London to a bank near Oxford Circus on Thursday afternoon. Mr. Idehen drew out £241.590 - about \$452.000 at the current exchange rate - in bundles of £20 notes, mostly used and untraceable, and put the money in a bag that he planned to hand over to his brother, who runs an importexport business, police said. They said Mr. Idehen asked Mr. Butler to stop at music shop, and while he was inside the cab left.

# ANAMBRA STATE GOVERNMENT **MINISTRY OF WORKS & HOUSING ENUGU, PREQUALIFICATION**

The Anombro Stote Ministry of Works & Housing invites firms from member countries of the International Bank for Reconstruction and Development (IBRD) and Switzerland to participate in the prequalification for the underlisted contracts for the construction of Droinage & associated works in the context of Immediate Measures Programme for Onitsho Urban. The cost of construction of the Droinage Works (immediate measures) will be partly financed by a loan in various currencies received by the Federal Government of Nigerio from the IBRD. The work is billed in two lots which may be awarded separately.

Scope of Work:

# Lot 1. Northern Part

\* supply ond loying of pipelines, construction of monholes, stilling bosins and other ancillary structures Reinforced concrete pipe L = 0.6 km, Nom.Dio. 900 mm steel pipes L = 1.2 km, Nom.Dio. 750 mm · 900 mm

length opprox. 7.3 km

- \* Construction of reinforced concrete chonnels width from 2.0 to 5 m, depth from 1.0 to 2.8 m length 5.5 km.
- RC road side droins L = 2.2 km.

# Lot 2. Southern Part

RC open canal

width from 1.5 to 10.0 m depth from 0.75 to 2.25 m totol length 4.5 km

RC road side droins Public toilets Improvement of droinoge bottlenecks

# THE PROGRAMME OF WORKS WILL BE AS FOLLOWS:

Tenders for Controcts colled December 17th, 1981 latest date for award April 17th, 1982.

# APPLICATIONS FOR PREQUALIFICATIONS SHALL INCLUDE THE FOLLOWING INFORMATION

- exomples of similar work performed by the opplicant including experience in developing countries; \* certificates of satisfactory completion of the above works should be submitted:
- \* resources of the contractor, including plont, equipment and personnel;
- \* structure of the company, including nomes of parent, subsidiory and associated componies;
- Annual Reports and Balance Sheets for the last three years and References.

# The Last of Castro's Castoffs

No problem arising from last year's "boatlift" of 125.000 Cuban refugees is more vexing than that created by the 1.900 refugees ruled excludable by U.S. immigration officials. Normally, aliens with criminal records are promptly shipped back home, but in this case Cuban President Fidel Castro won't hear of it. So for more than a year, the 1.900 have remained in a strange limbo. In law, they have not yet been admitted to the United States. In fact, they are doing time, hard time, at the federal penitentiary in Atlanta.

Immigration officials bave been unable so far to figure out what else to do with them. even though a year has passed. All the more reason to praise U.S. District Judge Marvin Shoob for the initiative be took last week in Atlanta. Government bandling of the matter is a disgrace, he says. "You can't bold people in prison as an alternative to deportation.... It's patently unfair."

To force the issue, he is insisting that the 1,900 inmates be sorted out. He wants to release those who pose no danger. But even by relatively lenient standards. that may only be a few hundred. What about the rest?

Another hundred or so are mentally ill or have been charged with crimes committed in the United States. They could legitimately be dealt with in U.S. courts and institutions. That would still leave a thousand or more who admit to having committed serious crimes in Cuba or who give immigration officials other reasons to believe that they came from Cuban prisons. What about them?

The minimally decent answer is for Cuba to take them back. And it is Washington's policy to try to negotiate just that with Fidel Castro. But be was evidently unembarrassed to send them - and the rest of the 125,000 - in the first place. If be keeps on saying no. then what?

Leaving the thousand in prisons indefinitely would raise serious legal and moral questions, oot to mention costing U.S. taxpayers about \$15 million a year. But simply releasing them might create a wbolly understandable storm of protest in Florida, and other states where Cuban emigres are likely to congregate.

There is a middle way. Washington could create a special probation program for the inmates whom it feels reluctant to release. They could be made subject to strict conditions and close supervision, perhaps in halfway houses in several cities, with access to social services. Those who did well in the outside world would eventually be released and given resident status. Those who violated the conditions of probation could legitimately be returned to custody.

Such a program would require special legislation and supplemental funding. But it would likely be cheaper than leaving the Cubans in prison. And it would reflect Judge Shoob's main motive: In contrast to Fidel Castro's callous conduct, it would be the right thing to do.

# **Locking Handcuffs of Gold**

The gold standard: The term conjures images of clipper ships and William Jennings. Bryan. But to the "supply side" economists who now enjoy power in Ronald Reagan's Washington, the gold standard is no historical artifact. They are pressing Mr. Reagan to follow up on his big tax and budget victories in Congress with a plan that would back the value of the dollar with gold. Only a rigid link between paper currency and precious metal, they claim, can restore confidence in the economy and lower interest rates.

The idea is no less realistic politically than, say, big budget cuts or wholesale firings of striking air cootrollers: If this president wanted a gold standard from Congress he could probably get it. Nor should it be dismissed as economic nonsense: A gold standard is at least a plausible way of reducing the government's contribution to inflation.

What's really wrong with a gold standard is that it probably wouldn't work. And even if it did, Americans wouldn't like one likely result — higher unemployment.

Supply-siders want the government, once

There are practical problems with a gold standard. Would other countries follow suit, pegging their currencies to gold, and thereby also fixing exchange rates between currencies? If not, credit - and inflation - could still wash across national boundaries. What would happen if vast amounts of gold (or new technologies to extract gold) were discovered? In the 16th and 19th centuries, such discoveries led to worldwide inflation.

The biggest problems, though, are analytic. The Fed does not allow expansion of the money supply out of some perverse wish to raise prices. The goal is to allow sufficient credit to keep the economy running near capacity. Inflation is an unwanted byproduct, the alternative to unemployment and bankruptcies. While a gold standard might prevent inflationary increases in the money supply, it wouldn't keep the economy moving.

But that misses the point, advocates of the gold standard reply. If we could truly count on the government to stop inflation cold, it would restore confidence in the economy and lead to a boom in savings and investment. Yet a government that hobbled itself by reducing discretion to create money could, as easily, restore that discretion. It bappened in 1934, when President Roosevelt severed the tie between gold and the dollar in order to stimulate U.S. exports. It happened in 1971. when President Nixon dumped gold because doing so was politically preferable to higher unemployment. Why should anyone believe that it wouldn't happen again? Imposing a gold standard is like a dieter putting a lock on the refrigerator. If one has self-discipline, it isn't necessary. If one does not, there is always a way to find the key. SOMETHINGS

GOTTA BE DONE

THEY REPRESENT AN

ABOUT THE HUMANS ...

INTOLERABLE THREAT

**Appropriate Challenge** 

But Libya is vulnerable to pressure, and Col. Qadhafi himself might easily be swept away by a military coup. So it was entirely appropriate for the United States to challenge, by having naval maneuvers there, his claim that the Gulf of Sidra belonged to Libya. It was entirely appropriate for U.S. planes to shoot down any Libyan aircraft threatening those maneuvers. A continuing squeeze on Col. Qadhafi also makes good sense. It denies opportunities to the Russians, and is a relatively cheap way of telling the Moroc-cans and the Tunisians, and the Egyptians and the Sudanese and the Saudis, that the United States cares about their security interests. Cuba presents the same kind of

Richard Nixon as under Jimmy Carter, centered around efforts to

# The Myth Of U.S. Lag In Research

By Daniel S. Greenberg By Daniel J. UTCODER WASHINGTON — A childred faith in the wonders of his ence is revealed in wide acceptance of the neuron that the Unital States has fallen behind its com-petitors in support of research and that U.S. industrial inisfortures that U.S. industrial misfortunes are related to this supposed lag. The difficulty is that the United States does not lag — not by my-reasonable measure of research and development spending and performance. And this, in two, webt to stir a lot of wonder show performance. And this, in the ought to stir a lot of wonder above the mighty snow job that industria and academic research leaders have produced concerning the basith of science and technology in the United States. The new tax bill yields to their alarms by providing additional in-

alarms by providing additional in-centives for industrial research though on its own, U.S. indian has increased research and devel opment (R&D) spending from Sid billion in 1971 to a planned Sig billion for next year. Meanwhile it has been so often said that the fed. eral government is "cutting back" on support of research that some plain numbers have gone unot-reed. In 1971, according to the Na-tional Science Foundation, Wash ington spent \$14.9 billion of R&D; in 1982, it will spend \$17.6 billion. Some cutback.

Even under the budget-whack-ing Reagan administration, R&D spending will be up by a heathy 11 percent next year. As elsewhere in the budget, the bulk of the growth is alloted to military R&D: but with the exception of the vindictively cut social sciences, almost all fields of federally supported R&D are due for budget increases. For the past decade, research has kept ahead of inflation by an average of 2 percent a year; that's not much, but it is oot so had in hard. times.

The often-made lamentation about Western Europe and Japan surpassing the United States m spending on research is so nonzensical that its unchallenged use in public discourse invites curionity about what other nonsense has easily passed for fact. With great statistical dexterity, the mandanna of science regularly invoke the faseign menace, as was done last verwhen the president of the National Academy of Sciences, Philip Hapdier, said, "I can too easily imaginea scenario in which we congramlate ourselves on our current cop of Nobel prizes, for vesterday's research, while science elsewhere overtakes and perhaps surgasses ours." His immediate concern sa that several other nations were increasing their share of gross tational product going into RAD: while the United States' hadslipped from the peak it had reached during the big-spending days of the moon landing program.

is the United States indeed fating hehind? According to George-N. Carison, of the Treasury De-Tax affairs, writing in the currentissue of the journal Technology in Society, "The United States spends more on R&D than any other country in the world, and more than France, West Germany," Japan, and the United Kingdom combined."

and forever more, to fix the price of gold in dollars, at, say, \$400 an ounce. Those who thought gold to be more valuable than \$400 could buy all they wanted from the government. Those who thought it less valuable could sell all they wanted to the Treasury.

The idea is to handcuff the government, letting market forces rather than the Federal Reserve change the money supply. If people bought gold with dollars, the money supply would go down; if they exchanged their gold for dollars, the money supply would increase. Consequently, supply-siders argue, the government would no longer be able to feed inflation by printing money at will.

Doctors from 25 nations have warned that

# **Reagan: The Greatest Nuclear Deterrent**

# By William F. Buckley Jr.

take out San Francisco and Los Angeles with its own nuclear bombs.

We have, especially in the years gone by, worshipped at the altar of ambiguity. Adlai E. Stevenson's mind was so refined, his votaries used to think, that he could see into the very bowels of the ambiguity of the universe. George F. Kennan, as be headed toward ambiguity, became more celebrated by the acade-ШY.

### Ambiguity Was King

Oh, there were certain questions about which ambiguity was oot permitted: the prop-osition that the United States should instantly get out of Vietnam, for instance. But in matters ouclear, ambiguity was king. And the transcription of ambiguity was: If the Soviet Union hits the U.S. Minuteman installations, how

can the United States order its submarines and bombers to hit the Soviet Union back, when Washington knows that in that event, the Russians' second nuclear volley would aim at U.S. population centers?

The men in the Kremlin, assessing the character of Ronald Reagan, know that they are not dealing with an ambiguist in the above sense. Mr. Reagan is plain-spokenly attached to the proposition that if the Soviet Union starts a nuclear war, the United States will in-stantly retaliate. He is wedded to that proposition on the grounds less that ouclear incineration would be poetic justice for the Soviet Union than that the way to prevent Assault One is to make it unambiguously clear that Assault Two would follow. This is a very risky world. But Mr. Reagan is making it less so. C1981, Universal Press Syndicate.

suppressors may be.

leaders

A decade after the Apollo program, is the United States behave in the slice of GNP going to re-search? Not so, say the latest fig-ures from the Organization for Economic Cooperation and Development, which reports the U.S. figure at 2.4 percent. Figures for the United States' big competitors, West Germany, 2,1 percent; Japan 2 1.9; and France, 1.8.

# **Alarmist Tales**

By a wide margin, the United, States' outspends them on military research, which is economically sterile, regardless of what the spinoff theorists contend, Even so, none of those nations even comes close to U.S. spending on civilian research.

Lacking a voting block and unable to forget science's pre-war poverty, the leaders of the scientific community long ago took to my lying oo alarmist tales and woeful prophecies for collecting political and budgetary support. A couple of years ago, for example, the pres-ident of the Massachusetts Insttute of Technology proclaimed that the science-government rela-

tional standings for receipt of gov- --

States suffers from an insufficienin difficult times. But it is not true. And when that dawns on the paymasters, the statesmen of science, are going to face embarrassing

them

lose sight of the fact that they are actually trying to force their own standards on others who may not agree with them. I think that suppression of facts, all of them or any of them, can only result in unfortunate or evil occurrences, no matter how well-intentioned the

For instance, the entire Victuam War, its beginning, its continu-ance, and its escalation, were the

result of suppression of the true facts in the case. History is full of similar instances, where bumans lost their lives and their property and their children, simply because their governments and religious suppressed the facts and supplied false ones to account for their policies.

My own experience was that it is better to bring up one's children with a full knowledge of the facts, unedited by any well-meaning textbook "cleansers," and to teach

them to respect the facts of the case. This leads to many anxious moments and many gray hairs, but in my own case, it also led to a family of children who can make their own decisions independently and to whom any parent could point with pride. J.F.T. SPENCER

their sympathizers, one should oot Montpellier, France.

**Antibiotics: Trouble Ahead** able without a prescription. In the United States, they are widely overprescribed. Both doctors and patients are responsible for that. Antibiotics are often given for too long or in too large doses. Few doctors haven't met the patient who is disappointed if be or she leaves an expensive office visit without a prescription - even if the problem is a cold and even though the doctor knows that colds are caused by a virus and are therefore not sus-

ceptible to antibiotic treatment. Another serious problem in the United States is the use of antibiotics in livestock feed to prevent disease in overcrowded feedlots and to promote growth. The evidence linking this practice to drug resistance in bumans is suggestive but still controversial. There is, however, no need to wait for final proof. The United States should promptly adopt the European compromise of limiting such use to antibiotics that are not used in humans.

If present trends continue, the day may not be far distant when doctors are faced with buman infections resistant to most available antibiotics. Nor is there an unlimited supply of safe and affordable new antibiotics. There is a need for everyone --- doctor and patient, developed and developing nation — to understand that the "wonder drugs" that have transformed mankind's health are themselves in serious danger.

THE WASHINGTON POST.

# In the International Edition

### Seventy-Five Years Ago August 24, 1906

NEW YORK - Another conspiracy to overthrow President Castro of Venezuela is disclosed by the arrest of Capt. George Boynton, recently resi-deotial manager of the Orinoco Corp., and Mr. L.E. Thomson, a lawyer, accused of planning to counterfeit Venezuela's silver coinage. Capt. Boynton admits that be ordered dies to counterfeit coins, but is amazed at his arrest, asserting that "President Castro has milked Venezuela so there is not a dollar in the country. This was the only way to get money to start a revolution. It is regarded as perfectly legitimate in South America to manufacture money for such purposes, and I understood that if the revolution were successful, the issue would be legalized."

## **Fifty Years Ago** August 24, 1931

LONDON - Complete uncertainty prevails as to the next move in the British political situation. In the midst of complete confusion it is obvious that Premier Ramsay MacDonald is still unable to convince the majority of his cabinet of the need of governmental economics. It was stated in Labour circles this morning that several cabioet ministers had refused to follow MacDonald to the extent be wished to go to satisfy the Cooservatives' demands for ruthless cuts in governmental expenditure. Under the circumstances talk of a coalition government was revived. Early in the morning the king reached Buckingham Palace from Scotland and within a couple of hours had summoned the premier.

(H1

机声。

•.3

NEW YORK - It used to be that a little money. and a little inventiveness would go a long way in the personal computer business. Apple Computer, it is now legend, was started by two college dropouts working in a garage. Tandy, now one of the industry's leaders, invested just \$150,000 to develop its first computer.

Now the ante is rising dramatically. The race is intensifying, and the personal computer industry is seeing an influx of participants. In May, Xerox became the first major office equipment company to enter the market. Then, 11 days ago, the biggest of them all. International Business Machines. jumped in. Other large computer and office coup-ment companies likely will enter the fray, and at least a dozen Japanese companies are waiting in

Up for grabs is a relatively new industry that knows few bounds. With computers costing less than \$5,000, and in some cases less than \$500, a

vast new market is opening up. Worldwide, about 500,000 computers costing less than \$5,000 were sold last year at a total value of \$730 million, according to Dataquest, a Cuper-tino, Calif., market research firm. That total will grow at least 40 percent annually, to 3.7 million units, valued at \$3.9 billion, in 1985, the firm esti-

. And with computer power becoming available to the masses, entire new businesses are opening up around it. Such services as electronic informanon retrieval and the writing of programs, or software, allow businessmen, engineers, schoolchil-dren and housewives to make greater use of the machines.

The entry of many big companies such as IBM will change the market, but it also reflects changes already occurring. The industry is moving to a second generation of machines, which will use mi-

croprocessors capable of handling 16 "bits," or units of information, at the same time, twice the processing power of existing 8-bit machines.

1BM's machine was one of the first by a major manufacturer to use the 16-bit microprocessor, but most others in the industry are expected to match that eventually. The new generation will thus be faster and capable of handling more complex tasks and larger memories.

The market for personal computers is also changing and is segmenting. While personal com-puters are often thought of as home computers, the industry definition is of any machine inexpensive enough for one person to own and use, whether at home or at work.

While the personal computer started as a device for the computer hobbyist, its major market by far has turned out to be the small-business user and professionals, such as doctors, writers and farmers who use the computer for their accounting, inventory, mailing lists and word processing, either at home or in the office. According to Fu-ture Computing, a Dallas consulting firm, small-business use accounts for nearly half the sales of under-\$10,000 computers.

Personal computers are also finding a place in large corporations. A large company might give all its analysts or engineers personal computers to replace or supplement a larger computer they all had to share.

# Games and Education

The emergence of this new market, which might soon rival the use for small businesses, undoubtedly helped prompt the entrance of IBM and Xerox, which have big sales forces aimed at selling directly to large corporations. Apple and Tan-dy are both setting up national-accounts pro-grams to aim at this market as well. A separate market seems to be emerging, direct-

# **DNA Firm in Limbo After Hutton Withdrawal**

### By Daniel F. Cuff New York Times Service

NEW YORK — Just two weeks ago, E. Russell Eggers vas on top of the world. Mr. Eggers, a seasoned executive, vas chief executive of a company that hoped to bring a resh management concept and sound financing to the new world of biogenetics.

His company, DNA Science, was more than just another. antry in a crowded field of about 40 enterprises battling for

position in the new science of gene-splicing. For one, the financial savvy of the E.F. Hutton Group stood behind it. In fact, E.F. Hutton dreamed up the venture as a way for Wall Street, academe and management to bring along and profit from the infant industry.

As conceived, DNA Science would be a flexible holding. company that would create "daughter companies" wherever company that would create "dalighter companies" wherever needed. If a promising scientist was working at a certain campus, for example, DNA Science might establish a com-pany nearby to accommodate him. In this way, DNA Sci-ence hoped to solve the increasingly aticky problems among scientists, universities and business executives in commercialzing advances in genetic engineering.

For starters, DNA Science had lined up the prestigious' Weizmann Institute of Science in Israel, the Battelle Memorial Institute of Columbus, Ohio, and John Baxter, a leader ir recombinant DNA research, at the University of Califor-

nia at San Francisco. It had brought in Mr. Eggers, 50 years old, a Rhodes Scholar, former banker, former head of Bendix Internation-al and former chief executive of Locute, at a salary of 200.000 a year to make it all work.

That day, he said, the DNA Science directors met to approve a last-minute participation of a new investor, Johnson & Johnson. The next day, closing was scheduled for an ini-tial offering of \$40 million that would have established the company. Some \$32 million had been raised from outside investors, leaving Hutton with an \$8 million commitment. Hutton was an investor only in that, if it wished, it could hold the shares that the \$8 million represented or - most likely - could try to sell them within an agreed-to period of

120 days after the closing. To Mr. Eggers's apparent dismay, and in what he de-scribes as a moment of "high drama," Robert Fomon, Hut-ton's chairman and a director of DNA Science, began to

# The fatal weakness, as many

# investors saw it, was that as part of

the agreement, Hutton would

# receive 15 percent of the company

### for a nominal cash investment.

raise objections to the Johnson & Johnson terms, urging that the company double its \$5 million investment. The meeting ended with no agreement on the Johnson & John-son participation, with the next day's closing aborted and Hutton out of the deal. To Mr. Eggers, Hutton's motives remain a mystery. Hut-

ton, for its part, has a pragmatic explanation. Johnson & DNA Science in turn had recruited a Nobel winner, Dr. Johnson was also negotiating for exclusive marketing rights Christian B. Anfinsen, to be chief scientist in Israel for a and Hutton saw trouble there.

For whatever reasons, the Hutton deal is dead. The money has been returned to the investors, and Mr. Eggers is attempting to sort out the events that evidently stunned and embarrassed him. He disputes the Hutton explanation, and says he is concerned about Dr. Anfinsen "stranded out there" at the Weizmann Institute, Israel's scientific pride, which is set on 75 acres of lawn and gardens in Rehovot. Isracl.

"Twe got a moral responsibility to get that guy back," be said. And he arded that he was "sorry that the Weizmann Institute, after all its fears, didn't have the American parties live up to their agreements."

As for Hutton's explanation, he said, "This wasn't the way the whole thing happened, in my jadgment. This was a kind of rationalization of the closing. My personal view as a businessman was always that the corporation as a share-holder brought as much to the table as it took away. The facts show that the closing was canceled without any real discussion of that point. The active discussion took place after the closing was aborted."

The fact that Hutton sought to double Johnson & John-son's participation is a telling point to Mr. Eggers — "to have tried for more money in order to have perhaps closed the financing and then make a big issue that the marketing factor wasn't correct anyway."

Mr. Eggers became involved last October. Hutton had been working on the project for more than two years. The emotional author" of the project, as Mr. Eggers termed it, was Nelson M. Schneider, 42 years old, Hutton's drug industry analyst and biogenetic enthusiast, who became a vice president of DNA Science. (Mr. Schneider did not return several calls.) The other company vice president was Zsolt Harsanyi, 37, who was project director for genetics at the Congressional Office of Technology Assessment.

# **British Oil Policy Placing Emphasis on Conservation**

By Steven Rattner

LONDON - This year, Britain will finally achieve what all nations desire - self-sufficiency in oil. Twelve years after the North Sea discoveries, the economically troubled island nation can boast of petroleum reserves roughly equiva-lent to Knwait's. No longer must it depend on others — like most of the nations in the West — for any part of the basic fuel to run its economy.

But self-sufficiency, of course, has not made a lord of the average man, nor will it. With a population of 54 million, the value of a year's oil production amounts to just \$450 per Briton.

British oil, nevertheless, has provided an economic lift - including direct employment for an estimat-ed 75,000 persons, a strong pound and an ample balance-of-payments surplus. But at the same time, oil wealth has partly masked the con-tinued decline of British industries. In addition, exporters have been battered by the strong pound re-sulting from oil sales. And to some minds, the government's growing tax revenue from the sale of oil has been to bolster government spending, rather than investment.

Britain's heady new role as a major oil exporter has also raised questions about where it fits into the continuous jockeying between members of the Organization of Petroleum Exporting Countries and consuming countries such as the United States. Does it have the general consumer interests of the West at heart or does it secretly cheer on the efforts of OPEC's price hawks?

For Britain, the central issue has been how best to develop the oil to husband it or to pump it out for all the market can bear. A group led by the oil companies argues for as much oil production as market forces dictate, but a powerful faction in the government is on the verge of success in achieving conservation of a portion of the resource for the future.

In part, the argument for conser-vation rests on the need for national security in the event of a future world oil disruption. In addition, proponents of slower production believe that bolding output rough-ly to levels of consumption would avoid exacerbating the economie strains associated with the oil, such as the strong currency.

### Slow Development

This view of conservation, strikingly similar to the thinking in Kuwait, Saudi Arabia and other large oil-exporting nations, is now in the ascendancy. The British goverament has already moved to slow development of North Sea fields and is considered likely this autumn to order production limits, third of production levels. And labor demands

just this month, BP postponed a \$1.25 billion North Sea develop-"Without laying down a scientif-ic rule, it is broadly our aim to see ment project, reportedly because that the oil fields are managed and of the tax. On the other hand, such depleted in a way that extends selfsufficiency as long as possible into the future," said David Howell, secretary of state for energy, in a delays fit neatly into the government's desire to hold down production. recent interview. From mid-1975, when the begin-

Nigeria's bill for imported goods to sustain an intense development program oow exceeds the amount its oil exports earn by an estimated \$1 billion a month. At such a rate, Nigeria would exhaust its currency by a daughter campany to accom-modate a team headed by Dr. teserves in six months, said Thomas Peake, who heads Standard Oil-Co. of California's economics department.

Baxter, whom Dr. Eggers referred to as the "super cloner of the West," and his colleagues would If Nigeria lowers its prices, it will "put a lot of pressure" on the North African countries, he added.

have an equity interest in the com-The lower Saudi price has given an edge to the four U.S. oil compa-nies — Standard Oil of California, pany while continuing to work on Exxon Corp., Mobil Corp. and was lined up, Hutton in February Texaco Inc. - that operate the announced the formation of DNA money at the same price paid by Science. Mr. Eggers was appointed : outside investors. As for Hutton, Arabian American Oil Co. for the. Saudi Arabians.

a Saudi advantage," said Mr. Peake, "we will lose all or part of n" if the other countries lower

For all the divisiveness in OPEC, talk of the cartel splintering is not given much credence. But analysts say the current strains are likely to worsen and further hinder the cartel's effectiveness.

In the 1960s and 1970s, OPEC was bound together by the struggle against the oil companies and their monopoly in all phases of the oil

search division at the University of California at San Francisco. Dr.

in my opinion."

like drugs."

"To the extent that we have bad and sale of their oil, their various calling into question the organiza-Saudi advantage," said Mr. national interests are coming more tion's effectiveness. In particular, into play.

Also, OPEC has greater competition now from other oil sources. notably Mexico and the North Sea producers. OPEC's share of world production has dropped from 63 percent in 1973 to under 50 percent. Its own production is down to 21 million barrels a day from 31

million just two years ago. Market Share Issue

Analysis noted that OPEC had business. But now that OPEC's now held six top-level meetings members have achieved nearly to-al control of production, pricing agreeing on a single price for oil,

chief executive and president in

April. Mr. Eggers, as president of Locite, a Newington, Com, maker of high performance adhesives, had pushed earnings up to \$26 million from \$4 million in

five years. Before that he headed

Chase Manhattan's Paris branch,

while establishing a new bank for Chase in Switzerland.

million, but under the terms of the

final prospectus, a minimum threshold of \$40 million was need-

ed to close the financing. The clos-ing was set for July 28, but was postponed until Aug. 4 for a defin-tive agreement with Johnson &

In late July, he said, he attended a Hutton board meeting in which Mr. Fomon got the go-ahead for the S8 million commitment. But

things were different on Aug. 3. He said a senior partner in Hu-ton's law firm told him, "Fomon's going to bust the deal."

Mr. Eggers concedes that the

deal had negatives - among them

he lists the fact that the enterprise

was so large for a startup compa-oy, the risk of doing business in Israel, and that genetic engioeer-

ing, especially as perceived by can-

tious fiduciary investors, was being

hyped and overvalued on Wall

Street. The fatal weakness, as

many investors saw it, he said, was

that as part of the agreement, Hut-

ton would receive a 15 percent in-

terest in the company for a nomi-

in the aftermath, Mr. Eggers has

percent of the company's stock

nal cash investment.

International and ran

Bendiy

Johnson.

OPEC again demonstrated a glaring inability to lower prices offi-cially despite the weak oil market.

Analysts suggested that this in-flexibility, largely the result of domestic pressures within the producing countries, could severely hamper OPEC's ability to deal with always changing circumstances

"What this demonstrates is that OPEC has difficulties in coordinating not just prices, but production," said Morris A. Adelman, an rent \$8, making a compromise energy expert at the Massachus-Institute of Technology. much more likely.

Mr. Eggers estimates it is in the

hole roughly \$2 million to \$3 mil-

volved" and that the firm was

Hutton's statement said that "a

EXDERISES.

They have to do something about market shares. But, over time, OPEC itself

could benefit from a wave of price cutting. Analysts explain that as the high-priced African producers' reduced prices, demand for Saudi oil would be expected to diminish. By OPEC's next scheduled meeting in December, the Saudis therefore might be cager for a price increase to compensate for their lower output. Similarly, the gap between highest- and lowestpriced OPEC oil may well have shrunk to \$3 or \$4 from the cur-

together a more attractive package

As for Mr. Eggers, be said, "I get mad, but I get over it quite

quickly. The company has good

bones and maybe parts of it will

find a home. For now, I'm going to

try to see if I can't save this com-pany." He is trying, as he says, to

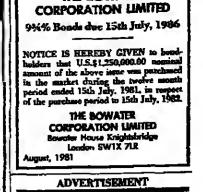

"resouffle" the financing but he

By Robert J. Cole	ed that it

New York Times Service NEW YORK - Nu-West Group of Canada, the owner of a 7.2 per-cent block of stock in Cities Service, has disclosed that it was discussing the "possible acquisition"

of all or part of its Cities Service stake by Mesa Petroleum or by other companies, including Cities Services itself. The Nu-West statement on Fri-

day said that officials of Nu-West and Cities Service had also discussed a variety of matters on a preliminary basis in the last month. These matters, Nu-West said, included Cities Service's oil and gas operations in Canada and Nu-West's investment in Cities Service stock.

Despite the careful wording, the implication seemed clear that the Mesa discussions involved cash while the Cities Service talks dealt with some arrangement for Cities Service to retrieve its stock and Nu-West to get in return either cash or Cities Service's oil and gas properties in Canada.

To date, the statement said, ocither Nu-West nor Cities Service had made any definitive proposals nor had Nu-West made any definitive arangements with anyone else to see or dispose of its CitiesService shares.

Nu-West repeated its intention to review its alternatives regarding its stake in Cities Serviceand add-

Yet there are growing oumbers of dam- aged souls from the hedonistic and egocentric dream machines who are woodering if, in fact, there is another way, and many are looking for relig- ious figures to redesign their broken lives. Io short, religioo needs herces as perhaps oever before. Elliott Wright, a journalist who spe- cializes in religion, is among those trying to provide some herces without

# CHESS.

SOUTH BEND, Ind. — The hyper-modern thought on an oppo-oent's pawn advances to the center is that the harder they come, the harder they fall. Rather than be totimidated by aggressive central thrusts, the hyby aggressive central thrusts, the hy-permodernist encourages them, in-tending to hare the ambitious pawn so far forward that it can be cut off from support and devoured. This has to be carried out with great exactness, for if the advanced pawn cannot be eliminated, it usually shoke the defined.

chokes the defender.

An example of precise hypermo-dem play is provided by the game be-tween two California grandmasters, Larry Christiansen of Modesto and Walter Browne of Berkeley, in the eighth round of the U.S. Championshin.

Christiansen broke away from the normal 6 B-Q3 in the Nimzo-Indian Defense to vecture the ultraaggressive thrust with 6 P-Q5?! But how important was it to force the retreat with 6 . . . N-K2? The White QP, now under attack, could oot be defended where it was, and 7 PxP, BPxP would only have yielded Black a pawn preponderance in the center. Christiansen had, of course, relied on the cramping effect of 7 P-Q6.

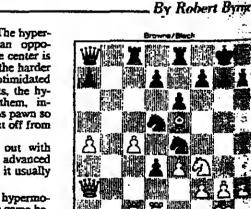

the cramping effect of 1 r-vo. After 7... N-B4; 8 Q-Q3, Chris-tiansen was prepared to refute 8... QN3? by 9 P-K4!, NxQP?, 10 P-K5, winning a piece. However, Browne discovered a sharp counter-gambit with 8... P-QN4!; 9 PxP. B-N2, ensuring that the advanced White QP would permanently be cut off from support. off from support.

Thus, after 12 ... NxQP, the White spearhead had fallen and Browne could look forward to the ad-

Browne could look forward to the ad-vance of his central pawn majority. Moreover, after 13 R-Q1, 0-0, defense of the White QNP by 14 P-QR4 could have led to 14 . . . P-QR3; 15 PxP, BxP, opening the QN file for a later attack on the backward QNP. Therefore, Christiansen sacrificed his foremost ONP by 14 P-QR3, BxQN; 15 PxB (15 RxN, B-R4; 16 B-Q2, B-B2; 17 R-Q4, P-Q4 would have conceded Black a powerful attack be-ginning with 18 . . . P-K4), NxP. Unfortunately, however, he soon missed the chance for 19 BxP, N/2-Q4; 20 B-N5, P-QR3; 21 B-KB1, ExN; 22 PxB, NxBP, 23 BxN, RxB; 24 BxP, which might have beld the game. game.

game. Ou Browne's 21 ... Q-R11, it was useless to attempt 22 QxP because of 22 ... P-QR4: 23 B-Q6, N/2-Q4, followed by 24 ... NxBP, with clear superiority for Black. After 23 QR-B1, Browne should probably have played 23 ... Q-B3 to consolidate his atvantage. Instead, he tried 23 ... B-Q6: 24 BxB, PxB, trusting in 25 RxP?, N-K5: 26 B-K5, N-N5! to punish the capture of the QP.

However, Christiansen's interpola-

# **Dodgers Hit Larsen 25 Years Late**

# By George Vecsey New York Times Service

NEW YORK - Twenty-five years later, the Dodgers finally got to Don Lar-sen, when Pee Wee Reese stroked a ground-role double to left field on Satur-

It was far too late to do the Brooklyn Dodgers any good and it took nothing away from what Larsen accomplished for the Yankees on the sunny afternoon of Oct. 8, 1956.

For that one afternoon, Larsen was the only perfect pitcher in World Series history, beating the Dodgers, 2-0. He came back for another try Saturday in Yankee Stadium on Old-Timers Day,

which was arranged in his honor. Tall and slightly graying and slightly over his playing weight, Larsen was a focus of attention in the Yankee clubhouse far beyond what his career statistics might warrant. He won 81 games and lost 91 in the majors, but as the old Yankees dressed in the cubicles of the new Yankees, Larsen rated crowds equal to those drawn by Joe DiMaggio and one per-

### - Lost 21 in '54

Until that afternoon in 1956 he had been an ordinary pitcher, just good enough to lose 21 times in 1954 for Baltimore and be traded to the Yankees. that winter. He had a reputation for carousing and was a good-enough hitter to be placed seventh in the order occasionally by the manager, Cascy Stengel. But in 1956 he simplified his pitching

motion and turned in 11 victories, the most he would ever have in the majors. He pitched badly in the second game of the Series and was surprised when Stengel named him to pitch the fifth. He

"Tin not saying much about what 1 did that night," Larsen said Saturday, aware of versions that had him feeling no pain the night before perfection. "Let's just say we had a few rounds."

The next afternoon, with the fall shadows slashing across the stadium. Larsen retired 27 straight Dodgers. On Saturday, persons from his past came up to . him at his locker and shook his hand.

Mel Allen, who broadcast that game on television, recalled how the players had been superstitious about using the phrase "no-hitter" and how he had used other devices, like "the Yankees have all the hits in the game." Larsen smiled at that memory. He.

said he had known he was pitching a perfect game by the seventh inning, and he recalled having sat next to Mantle be-"T even mentioned it to Mickey," he

remembered. "I said, 'Everybo ty clams up,' and Mickey did, too. It was too quiin the degout." Mantle visited Larsen's locker cu Sat-

urday and recalled the incident. Mantle said: "I think I moved away when he said that. It was a superstition, like s ep-ping on the baseline. Yon just didn't lo

Another familiar face in the cluthouse was Frank Scott, who was the first of the players' agents. He arranged personal appearances for athletes long before agents were permitted to negotiate contracts. Scott remembered the fallout from Larsen's perfect day. "I have never seen an athlete make

more money from a single event," he said. "Don got \$7,500 from the "Bob-Hope Show," which was the most they had ever paid for a guest. He made a lot

spent the evening before in the company of Arthur Richman, a friend and a jour-nalist. of supermarket appearances at \$2,500 a crack. 1 would say he made a total of \$35,000 or \$40,000 that winter, which is like \$150,000 today." Larsen recalled: "I did all right but

then I finally had to say, 'That's enough,' and I went back home. I had to get away from it." He also remembered that the appearances bolstered the modest salaries of his time. He pitched from 1953 through 1967, finishing with the Chicago Cubs, and said he had never made more than \$20,000 in one season. Sitting in a clubhouse where athletes make \$20,000 in hours or days, he said: "I never begrudge anybody making money. If it's there, you take it. I think most of us wish we were still playing to-

day." Don and Corinne Larsen, who have been married 24 years, live with their son, Scott, in Morgan Hills, Calif. Lar-sen works as a salesman for a paper company near San Jose, and says his name helps in sales conversations, but he adds: "It all depends on the product. "Is blue being on a good ball club. You It's like being on a good ball chib. You learn to be competitive." He was reminded of that when greet-

ed by Reese, visiting from the other clubhouse. Wearing a white Dodger uni-form, Reese told Larsen: "We'll beat your butt today, although if we couldn't do it 25 years ago, I don't know how we'll do it now."

## Finel Call

The Dodgers certainly could do nothing 25 years ago. On Saturday, people recalled Andy Carey at third base knocking down Jackie Robinson's screamer and Gil McDougald at shortstop throwing Robinson out. Larsen said: "I always remember Mickey chas-ing down Gil Hodges's long ball in the fifth inning."

Don Larsen getting a pat from Casey Stengel, the Yankee manager, after pitching his perfect game against the Dodgers in the 1956 World Series.

And Reese remembered how the Dodgers, still "thinking we could get a man on base and somebody would hit a homer," scat up Dale Mitchell as the 27th batter, only to have Babe Pinelli, umpiring his last major league game, call a third strike. Reese said, "A lot of us thought that pitch was high." And the Dodger captain, then and now, added for effect: "A lot of us."

It was too late to change a lot of things Saturday. In the middle of the inthings Saturday. In the middle of the in-troductions, there was a panse to recall that Robinson and Hodges and Elston Howard and others had passed away, and that Roy Campanella, who received a standing ovation, has been in a wheel-chair for 23 years.

But the old heroes of Yankee Old-

Timers Day received the usual cheers as Larsen stood near home plate and shook the hand of every player introduced. Then the old Dodgers tried to make up for the total shutout of Oct. 8, 1956. Reese did not wait long, stroking a long double off Larsen, who then made Sandy Amoros skip rope with an inside pitch. After Gene Hermanski had forced Amoros at second, Larsen retired from the mound to let his old teammates take over. The Yankees lost, 6-3, needing seven or eight onts in one inning before Mickey McDermott hit a three-run homer over Amoros's head. By that time, the old Yankees were already celebrat-ing what really mattered — the good times and the perfection that struck Don Larsen one afternoon 25 years ago.

followed by another left. Gomez went halfway through the ropes near Sanchez's corner. He was up at the count of eight, but Padilla stepped in and stopped the bout. Sanchez, 22, improved his record to 40-1-1 with 30 knock-

outs. He won the title Feb. 2, 1980 with a savage beating of Danny (Little Red) Lopez. He defended it six times before fighting Gomez, including another lopsided victory over Lopez in a rematch in June of 1980.

First Loss

Gomez, 24, suffered the first loss of his pro career. He fought to a draw in his pro debut, then went on the streak of 32 straight knockouts. He won the WBC super ban-tamweight crown May 21, 1977, when he knocked out Yum Dong-Kyun of Korea in the 12th round

in San Juan, and defended the crown 13 times. The loss left Gomez without a title. WBC officials had mied before the fight that he would have to relinquish the super-bantamweight (122-pound limit) crown because he failed to defend it against the top-ranked challenger in that division.

# **Page Remains Unbeaten**

ATLANTIC CITY, NJ. (UPI) Greg Page, despite being taken to the ropes on numerous occanained unbeaten and resions, ren

United Press Internatio KIEV, U.S.S.R. - The United States completed a 203-141 victory over the Soviet Union Sunday in the first dual swim meet between them on Soviet territory since 1977.

The Russians, clearly outclassed during the first two days of the three-day meet, fought back Sunday, taking half of the 10 events. But the Americans, young and confident, clicked off four victories in a row to keep a comfortable margin

Only one world record was set - Craig Beardsley of the Universi-ty of Florida broke his own mark in the 200-meter butterfly, swimming the distance in 1:58.01 on Saturday.

### **One-Man Spectacular**

Jeff Float of the University of Southern California staged a one-man spectacular in the 400-meter medley, clocking 4:24.24 Sunday to come from behind to beat Sergei Fesenko, 4:24.66, and the Ukrainian-born favorite, Alexander Sidorenko.

The fiercely anti-American crowd, which went berserk when it appeared that Fesenko was headed for victory, fell silent during the final 25 meters as Float muscled his way to the touch.

Mary T. Meagher had no trouble winning the 200-meter butter-fly but she failed to break her own

world mark. Meagher swam the distance in 2:09.80, far off her 2:18.85 in the 200-meter world mark. She was followed by her teammate Mayumi Yokoyama in 2:15.34.

The Soviet Union won its first two events of Sunday after the United States already had sewn up

the team title. Larisa Gorchakova brought the crowd to its feet with a 1:03.70 performance in the 100-meter backstroke. Then Robertas Zhulpa kept up the pace with a time of

# **Pentathlon Title**

Taken by Swede

United Press Inte LONDON - Anne Ahlgren of Sweden won the individual title at the women's World Modern Pentathlon Championships Saturday, barely holding off West Germa-ny's Sabine Krapf and Britain's

Wendy Norman. Ahlgren finished only 13th in the final event, the 2,000-meter cross-country run, almost one minute behind the winner, Joy Hansen of the United States. But she managed to hold on to her overnight lead to win with 4,975 points to Krapf's 4,966 and Norman's 4,965. Britain retained the team title, finishing with 14,576 points to 14,416 for the United States and 14,382 for Sweden. West Germany

was fourth with 14,323.

breaststroke. Second was compatriot Arsen Miskarov in 2:19.35. It was only the second time in the meet that Soviet men placed first and second.

### Cooler Senday

Meagher, the 16-year-old sensation from Kentucky, easily took the 100-meter butterfly Saturday. the day the U.S. team assumed an insurmountable 139-85 lead. The world record of 2:06.37 that Meagher set last year far outclasses the best-ever Soviet time of 2:14.04.

The temperature dropped sharply Sunday after two days of warm sun that made the 2,000 spectators at the Dynamo Kiev pool envious of the competitors. Skies were overcast on Sunday.

The Russians, clearly outclassed in most events, fared best in longdistance races. Vladimir Salnikov took the 1,500-meter freestyle in 15:15.41, with Alexander Chaev second in 15:24.32.

The U.S. head coach, Don Lamont, said he was surprised hy the strength of the Soviet women. Prior to the meet, Soviet coach Ser-gei Vaichechovsky said he expect-ed the American women to sweep their events.

But Larisa Gorchakova took the 200-meter backstroke on Saturday and Larisa Belakon won the 200meter breaststroke.

Austin Settles Down to Defeat Lloyd in Tumultuous Canadian Open

From Agency Dispatches TORONTO — Tracy Austin de-feated Chris Event Lloyd in straight sets Sunday to capture the Canadian Open Tennis Championships, 6-1, 6-4.

Austin, the only player who holds a career edge over the Wimbledon champion, prevailed with surprising ease, using superior speed and a relentless string of unforced errors by her opponent to claim the \$34,000 winner's purse.

It was Austin's eighth triamph over Event in 14 matches stretching back to 1977. But six of those victories have come in their last seven meetings at a time when Lloyd has been virtually unbeatable by anyone else.

Austin gained a berth in the fi-nal on Saurday, when tempers cooled long enough for her to beat Martina Navratilova, 7-6, 6-4, and for Lloyd to beat Andrea Jacger, 4-6, 6-1, 6-2.

### Front-Page Incident

The calm at the National Tennis Center on the York University campus followed two tumultuous days in the event, which had drawn every top player.

Last Thursday, angered over line calls, Bettina Bunge stormed off the court at 0-5 in the third set of her match with Pam Shriver.

On Friday, equally distraught over the officiating, Shriver directed insulting remarks at Austin as the two met at the net following Austin's 6-2, 7-5 quarterfinal victory. Austin left the court visibly upset. The incident was so extraordinary for women's tennis, and the language so coarse, that the usual-ly traditional Globe and Mail

newspaper reported it on the front page Saturday morning. The Shriver-Austin encounter included a postmatch confronta-

tion between the umpire, Karl Allison, who had overruled linesmen at least a half-dozen times, and Trish Faulkner, the tour director

singles matches.

of the Women's Tennis Association. Faulkner removed Allison, who heads the Ontario Umpires Association, from further duty in

> **More Sports** On Page 11

As if this were not enough, Hana Mandhkova of Czechoslovakia made an obscene gesture at a linesman during her 6-3, 7-6 loss to Lloyd in the quarterfinals. Mandii-kova, seeded fifth, had been upset all week about her seeding.

"I didn't expect it to be that easy." Austin said of her victory over Lloyd. "We're both mentally very tough and usually it's a ques-tion of who gets on top first."

Evert was generous in defeat, saying of Austin: "She is playing really tremendous and one thing that separates her from the other top players now is that she has had an injury and she's coming back fresh and tough."

### McEntoe in Final

KINGS ISLAND, Ohio (UPI) -John McEnroe, after trailing 4-1 in the first set, stormed hack to defeat Ranl Ramirez of Mexico, 7-6. 6-1, in the semifinals of the Associ-ation of Tennis Professionals championship Saturday night. On Sunday, McEnroe was to meet Chris Lewis of New Zealand, a 6-7, 7-6, 6-3 winner over Stan Smith in the other semifinal.

Tracy Austin, upset after Pam Shriver directed obscenities at her, is consoled by a tennis official at the Canadian Open.

# Language

# **Personally Speaking**

# By William Safire

NEW YORK - When Washington Post columnist Maxine Cheshire reported on Nancy Reagan's activities at the royal wedding, a reader protested about the use of the phrase "personal friend." Wrote Sandra Gottlieb of Bethesda, Md.: "Is Susan Meyer really a 'close personal friend' of Nancy Reagan's?

Are you sure she isn't a 'close, impersonal friend' or a 'distant, per-749 4sonal friend?" "Personal" is a

之 word that bas >. been snuggling up too close to ?? "Intend," To have a friend goes be-Safire yond knowing

somebody personally - that is, as between individuals, or, in sports lingo, "one on one." When a televi-sion performer says, "All my friends out there in televisionland," he does oot mean friends, if the word "friend" has any meaning: A friend is someone with wbom you have a personal rela-tionship. "He's my personal friend" is, then, redundant and a fit abject of scorn.

"Personal" is a word taking a beating in other respects. Advertisers have been using it tn mean "not bath size" — that is, "personal-size lvory." In that same small sense, a "personal car" is a small car, not a "family car." One uraditional meaning of "personal" is "individual," and such usages are not mistaken, but they are being overused. What is a "person-al computer"? Presumably it means that one person can work it, but can't one person work any computer?

"Personal and confidential" is a redundancy most of the time. "Personal" can mean "not official" or "not corporate," but the intended meaning is usually "This is be-tween him and me, Nosy Parker, and keep your prying eyes off it" — that is, "private." When "per-sonal" is used in that sense, "personal and confidential" is redundant. Letters addressed to me with that stuttening stricture are exa-mined by hordes of secretaries and news clerks, while letters marked "private" or "personal" are opened by me, personally, after I soak them in a tub of water.

TIME ONCE AGAIN for The Bloopies, those coveted awards to the advertising industry, bestowed annually on the most creative copywriters and laid-back layouters by the Academy of Academic Academicians.

The Elizabeth Arden "Millenium" Award for misspelling goes to the Happy Legs division of Spen-cer Companies for its "100 percent natural linen jodphur." Macy's department stores also like this spelling. The fndian city of Jodhpur, home of the riding breeches after which the jodhpur was named, is appalled.

The Inhumane Society Gold Toothpick for the most delicious classified ad goes to the English-language Mexico News, Mexico City, for: "Doberman. Easy to feed; will eat anything. Especially fond of children.

The Eat-Anything Doberman Collar for the unprovoked rapine of innocent verbs to Procter & Gamble's High Point coffee, which "has the hearty, robust flavor to decaffeinate the ooes you love.") The Freedom-From-Agreement

### Sonny Brunet, 48, on his daily hike.

the crew at a gas station, and the crew at a gas station, the those who work in the general store, in the gift shop, at the Fur-nace Creek Ranch motel, at the Neighbors don't get along. "The old green stuff keeps us here. My husband has a good job. But every summer I swear it's the last I'll spend in this saloon and the two restaurants.

No Dryer Necessary

One thing she doesn't need is a One tring and doesn't need is a clothes dryer. She says she no sooner has all her laundry hung on a clothesine outside than she starts taking it down. It dries that fast. "Working outside, f learn to pace myself like a turtle. With

the least bit of exertion you feel like everything is drained out of you," says her busband. "Being a plumber," Jonas says, "I'm accustomed to getting phone calls in the middle of the

night to repair a water pump that goes out in air conditioning units

"I have to get on the job right away before the people in the house collapse from heat prostration.'

Karen Noroman, 24, a tour

guide at Scotty's Castle, a jourist attraction, says, "People are always passing out from the heat while touring the castle, especially pregnant women."

Productivity is half of what it normally is for those who work out-of-doors in the summer heat," says Sonny Brunet. "A person working 15 or 20 minutes outside has to duck inside an airconditioned building to cool off. "You sweat a quart of water an bour and you have to replace

it or you dehydrate." This is the time of the year people put in for a transfer," says park naturalist Olson.

140 Miles to Nearest Grocery ft's not only the heat that is depressing, it's the isolation. Death Valley residents drive 140 miles to Las Vegas, Nev. - the nearest city of any size - just to

buy groceries. It's so hot that birds seldom fly during the day. They take cover in the shade, mouths open, pant-

Cottontails, jackrabbits, lizards, quail, snakes and other critters duck into holes, or hide under the bushes and the few trees here to escape the sun. They come out at night.

When driving, people who live here generally wear gloves to avoid burning their hands when opening car doors, grasping the steering wheel or touching any metal

"The heat plays all kinds of tricks on cars," Olson says. "Tires blow. Engines quit. Parts come unglued. Antamatic transmissions get so hot cars catch fire under the floor head?" boards.'

During the summer U.S. and foreign car manufacturers con-duct hot-weather road tests. Faucet Switch

Water beaters are turned off in summer and become cold-water storage tanks. Water in the pipes is boiling hot. So when you want hot water you turn on the cold water faucet to draw from the pipes; when you want cold water you turn on the hot water faucet to draw from the tank. That in itself is enough to

drive a plumber crazy.

brate, he brought back some of the talent that made the Newport Jazz Festival something special over the years - Dave Brubeck, Mel Lewis and his orchestra with guest saxophonist Zoot Sims; drummer Buddy Rich; pianist McCoy Tyner; trumpeter Dizzy Gillespie and guest vibes player Milt Jackson; and singer Nancy Wilson.
